America says a fond goodbye to Ol' Blue Eyes

By Christopher Parkes in Los Angeles

The US woke yesterday to the news that Frank Sinatra had died in the night, and it broke into song.

Newscasts celebrated the entertainment icon's career with song and film clips in the almost total absence of the maudlin sentimentality commonly accorded Amer

ica's popular heroes. In sunny Los Angeles, the voice of "The Chairman of the Board" introduced the Fox 11 News weather forecast with "Every time it rains, it rains pennies from heaven"

"The way you wear your hat" bounced in the background of another channel's

MSNBC promised all-day Sinatra coverage, shelving plans for extensive dissection of its part-owner's Thursday night coup, when 79m viewers watched the final episode of NBC's Seinfeld comedy show.

The last saloon singer's light baritone cozed into every interstice as editors uncorked tributes in preparation since his heart attack Francis*, and Ernest Borgnine mourned the loss of a 'great commodity", although he was neither.

In the real world, crowds gathered respectfully around monuments already installed in his honour. In Hoboken, New Jersey, where he was yanked into the world in 1915 bleeding from a torn ear - courtesy of the forcers applied to his 13lb bulk tough riversiders brought his keep in a commercial for flowers to a commemorative star embedded in the pavement. Fans swarmed around

lywood Boulevard's Walk of Fame and, for once, were careful not to walk on them. In Las Vegas, where he earned notoriety as a consort of mobsters, his recordings replaced the piped pap usually deployed to mitigate the clatter of the slot

Back on the small screen the torrent of reminiscence

One moment an old friend was heard explaining one of Sinatra's less-known nicknames - Butter - coined by Sammy Davis Jr, because his star power meant no one who worked with him ever went without butter on the table.

Alarm 115

Mexicans in rush to be macho on prescription

In Mexico, where sexual impotence is considered grounds for divorce, a black market is developing for the little blue pill called Viagra.

Pfizer's anti-impotence drug, which has become the fastest seiling new drug in history just weeks after its launch in the US, has been approved in Mexico by the ealth ministry and is expected to go on sale on prescription in a month.

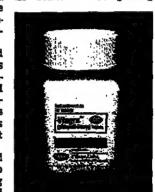

But so strong is demand for the drug among Mexico's macho males, that the Mexican authorities have urged Pfizer not to talk about Viagra to the media, saying its pre-sale marketing efforts should be directed only at doctors and chemists.

The government also had to call a press conference to warn Mexicans the drug could have side effects, and should not be used by healthy people to improve sexual performance. "This drug will not work for every kind of impotence and, more importantly, it is not an aphrodisiac," Francisco Higuera. a senior health ministry official, said. Pfizer has been similarly cautious in the US. saying "adverse events" in clinical trials included headaches, flushing and abnor-

US ECONOMY

Production edges higher

US industrial production rose 0.1 per cent in April, led by stronger than expected gains in cars and business equipment, the Federal Reserve Board said in its monthly report yesterday. This followed a gain of 0.3 per cent in March. Despite the price competition stemming from low-cost

Asian competition, manufacturing production rose 0.3 per cent after two months of decline. Manufacturing capacity is up 5.4 per cent from a year ago. The capacity utilisation rate for the sector fell to 80.8 per

cent. Gerald Cohen of Merrill Lynch said capital spanding was still strong so capacity would continue to grow, exerting further deflationary pressures. Nancy Dunne, Washington

MICROSOFT LAWSUIT

Legal wrangling continues

Talks between Microsoft and the US government continued yesterday as the software giant made its 11th-hour attempt to head off a landmark antitrust lawsuit. The group has agreed to delay shipping Windows 98, the latest version of its operating software, until Monday while talks continue over the weekend. In exchange, the government and several states have agreed to put their lawsuits on hold for a short time.

The case hinges on accusations that Microsoft has abused its monopoly power by seeking to crush its industry rivals - in particular Netscape Communications, its competitor in internet browser software. Richard Wolffe, Washington

MOBILE TELEPHONES

Link to ailments under study

Swedish researchers said yesterday they had found an apparent link between using mobile telephones and fatigue, headaches, and tingling and heat sensations in the ear and skin. In the only comprehensive study to date on the health effects of mobile phone use, a survey of about 11,000 Swedes and Norwegisns showed the symptoms increased the more frequently people used their telephones.

However, people who use mobile phones often may also have a stressful illestyle, which could be a contributing factor.
This could not be tested by the study. Reuters, Stockholm

Kentucky farmers take potshot at US drug law

By Nikki Tait in Chicago

Dope or rope? A group of Kentucky farmers, seeking to grow industrial hemp but in effect prohibited by US drug laws, yesterday marched into court, claiming that the US Drug Enforcement Agency is out of line. In a lawsuit filed in the

federal district court in Lexington, they maintain that the US Congress never intended to prohibit the legitimate production of hemp when it passed the Controlled Substances Act and that since there is no federal mandate, it should be left to individual states to decide whether hemp can, or

At issue is whether indus-

are distinguishable products. They come from different varieties of the same plant known as "Cannabis Sativa". To date, US drug enforcement agencies have argued that if industrial hemp is permitted, the country's marijuana laws would be undermined, since the seedlook the same and even the distinguish.

The Kentucky farmers, by contrast, claim that hemp marijuana are botanically and legally distinct crops and should be treated differently.

The farmers individuals and co-operative representing

By John Authers in Washington

Exchange Commission, yesterday launched a strong attack on the way mutual funds are sold, and raised doubts over whether private sector fund managers were ready for the extra responsibilities they would gain if the social security system was privatised.

He also unveiled plans to strengthen the corporate governance of mutual funds. with a much more interventors. His speech, delivered to the annual conference of the Investment Company Institute in Washington, follows data showing that sales of mutual funds are on course to set new records this year. and heighten growing concern that many savers hold investments which they do not understand.

"The financial literacy of Americans has not kept pace with the growth of fund investments or investor satisfaction. Three quarters of all workers have no idea of how much they need to save for retirement."

the world for years and He said this was "downright frightening when you imagine a privatised social security system, in which workers' basic economic well-being could depend totally upon their own investment savvy".

Mr Levitt complained that introduced last year to allow for simplified fund prospectuses had not been taken up uniformly by companies in the industry. "We're chagrined to hear that some of you intend to make only a few cosmetic changes and mostly leave your prospectuses as they are - the same dense, legalistic presentations that investors don't want, don't understand and don't read. We are not looking for a little bit of window dressing on the same lold recycled gobbledygook, he said.

NEWS DIGEST

RETAIL BANKING FURORE

Fair trading watchdog defends customer victims

Banks were told to treat their customers fairly yesterday or face being taken to court. The warning from the Office of Fair Trading follows a furore surrounding recent account changes at Northern Rock which has left thousands of savers worse off. The building society-turned-bank abruptly merged 11 postal accounts into three, forcing some savers to accept lower interest rates while stopping them from moving without notice. The OFT said the action appeared to show a "cavalier attitude to savers" and said it was concerned that other banks could treat their customers similarly.

John Bridgemen, OFT director general, said: "Customers do not expect banks to change arbitrarily the terms of a product, lock them into less favourable terms and conditions, fail to give warning of any changes and treat some account holders differently from others."

He said he had the power to take companies to court "if they fall to amend or remove terms which . . . cause detriment to consumers. The OFT said it was investigating 30 complaints against Northern Rock but the bank itself has received thousands of complaints.

Sheres in Northern Rock plunged 51 pence to 555p in Lon-

don: Other retail banks also fell sharply.

Leo Finn, Northern Rock chief executive, said: "We sincerely believe we have acted with the highest standards of probity and good faith." Christopher Brown-Humes, London ondon stocks Page 17; Lex, Page 24; Weekend Investor, Weekend Page XXII

PENSIONS INDUSTRY

Warning on EU currency

A leading pensions professional yesterday warned the industry of potential for chaos when the European single currency is taunched in January 1999. Alan Rubenstein, managing director of Morgan Stanley Dean Witter, advised more than 600 delegates at the annual conference of the National Association of Pension Funds not to make significant changes to their portfolios at the beginning of next year when currencles will be converted into the euro. "The scope for disaster is

Mr Rubenstein, who was formerly pensions manager at LucasVarity, said he was particularly concerned about the mechanics of converting portfolios.

His joined others in the industry in predicting a shift into corporate bonds for UK pension funds, which typically have a heavy bias towards towards equity investing. This position asts with that of continental Europe and the US, where borids make up a far higher proportion of assets. Mr Rubenstein said he found the US argument in favour of corporate bonds "compelling". Jane Martinson, Brighton

NUCLEAR REPROCESSING

Safety audit ordered for site

The troubled Dounreay nuclear complex in Scotland is to undergo what is likely to be the most thorough safety audit in its history, the Nuclear installations inspectorate announced

Having ordered the plant on Monday to close its fuel cycle arez Indefinitely, the watchdog said it had decided to examine every part of the plant in response to concerns of the public and employees over recent mishaps. The new audit will review nuclear fuel reprocessing, as well as radioactive waste mattagement and the plant's ongoing decommissioning. The plant, built in the 1650s to house Britain's experimental fast breeder reactor, needs heavy investment to achieve modern safety standards. Leyla Boufton, London

ROLLING STOCK LEASING

Call for code of practice

The rail regulator, John Swift, yesterday called for the privatised railway rolling stock leasing companies (roscos) to draw up a code of practice but stopped short of ordering tighter regulation of the industry.

John Prescott, deputy prime minister and chief transport minister, held open the possibility of the government taking tougher action. "It is unacceptable for an industry that receives nearly £2bn (\$3.34bn) of public subsidy to further

the three roscos by their managers for large profits. This prompted charges that the rosco privatisation had created more "fat cats" and focused attention on the lack of specific reculation on this part of the rail industry.

The roscos have argued that they compete between themselves and that there are no barriers to other large financial groups or rolling stock manufacturers entering the market. But Mr Swift said his review had shown that the roscoe did have "market power". Charles Betichelor, London Lex Page 24

FUNERAL INDUSTRY

US-based company probed

The Office of Fair Trading yesterday launched a wide-ranging incurry into the funeral industry after fresh allegations of ive pricing and over-aggressive selling, notably by SCI. the US-based funeral glant which has taken a 13 per cent stake in the UK business in the past four years. The inquiry will cover the £840m (\$1.4bn) "at need" business - funerals sold at the time of a death without pre-payment policies. John Bridgeman, director general of fair trading, said: "I have been increasingly disturbed by ellegations from many sources about the funerals industry," adding that the latest came in a Channel 4 television documentary shown in the UK earlier this week which linked allegations of pressure selling and overcharging by SCI to disrespectful treatment of the dead. The company failed to obtain an injunction barring its trensmission. Nicholas Turmins, Landon

INDIA: THE HIGH GROWTH MARKET OPPORTUNITY

In the last few days India has been much in the news. The nuclear tests carried out by the country have evoked strong reactions from across the world.

Indian Industry - CII - believe that these nuclear tests were carried out because of serious national security concerns, especially the nuclear environment in the region. CII also believes that India's commitment to national security and its international obligations and sensibilities have to be balanced. This is accepted by Indian leadership - political and industrial.

Indian Industry, and the CII, also believes that the international focus must remain on Economic Opportunities and Economic Partnership.

India is a high-growth market opportunity. In the words of President Clinton - India has the largest middle class in the world. Therefore, there is enormous purchasing power in the country and a steadily expanding market.

Indian industry - CII - has a message - a message that in every sector of the economy - agriculture, industry, services - there are huge opportunities for global business partnerships. Let's build on this together.

CII has continuously reached out to the world of international business and is committed to sustain this effort in the future.

INDIA'S AGENDA FOR ECONOMIC GROWTH

- A series of resource generation measures
 for capital expenditure to fuel growth
- Comprehensive Administrative Reforms to bring transparency in laws and regulations
- Substantial increase in investment in infrastructure
- Substantial outlay for Agriculture and modernisation of Agro-processing industry.

Married of Married .

- Special measures to promote and support Small businesses
- New National Housing Policy to promote nationwide construction activity
- A National Informatics Policy to be framed to promote widespread use of IT
- Public Sector Reforms: Restructuring and disinvestment
- Transparent, non-discretionary and nondiscriminatory Foreign Investment Policy
- Special focus on Education, Literacy and informal education

ECONOMIC VISION 2002-03

GDP Growth 9%
Agriculture 4%
Industry 15%
Services 7.5%
FDI US\$30bn/year

CONSENSUS ON ECONOMIC REFORM

- "The time has come to insulate the nation's economy as much as possible from the turmoil in its democratic polity."
- "We simply cannot afford to play politics with the nation's economy anymore. This indeed will be the real test of patriotism on the economic front."

Atal Bihari Vajpayee Prime MInister of India

"If there is a broad national consensus that the legislative changes can and will lead to improved business confidence, then ... Congress party will support such changes in Parliament."

Sonia Gandhi President Indian National Congress

(Statements at CII Annual National Conference on 28* April 1998)

THE GLOBAL BUSINESS OPPORTUNITY

Infrastructure Development

Telecom: US\$20bn investment up to 2002 Power: US\$178bn investment by 2007 Roads & Highways: US\$40bn investment by 2007

World leaders in search of a goal

What are the leaders of the sometimes said, simply adding world's eight most powerful Russia to the G7 is bardly this weekend? And will their discussions make any difference?

Tony Blair, who is hosting this year's economic summit, has done his best to cut out the waffle, to get the leaders to concentrate on important business, to agree on something more than platitudes. This time, the British prime minister has arranged that heads of covernment will meet on their own, without the usual sideshows for finance and foreign ministers. The agenda will be restricted to a few big issues, and the final communique - usually a rambling tour d'horizon, should be shorter

But is this enough to get the summits back to what they set out to be - a meeting of minds on strategic economic questions? Or is it time to junk the whole

As it happens, unforeseen developments have made this weekend's events seem more significant than in the past. The crisis in Indonesia and the nuclear weapons race in south Asia seem likely to dominate the discussions, though a united response ls improbable.

But, for all their urgency, events such as those in Asia are not the bread and butter of summits. When the O7 process first started in the turbulent 1970s, world leaders showed that they were at least trying to do something about the economic chaos around them. But since then

much has changed. First, relative economic power has shifted. It may be asked whether a global economic forum that excludes all Asian countries except Japan is sensible. For example, can the big issues on the agenda for this summit - the Asian financial crisis, how to improve employability for workers, transpational crime and debt relief - be usefully discussed by

Monetary issues

European monetary union, does the G7-G8 grouping make sense? Monetary issues will increasingly dressed by the central banks of a de facto Group of Three (US. Japan and Euroland). Perhaps the larger grouping. with a beavy representation of European countries, is now superfluous?

The G7 process was, in any case, a phenomenon that came into being during the later stages of the Cold War. The Seven were the big allies in the struggle against communism. Now that the the Berlin Wall has gone, it is enough to restore a sense of direction. Should the major powers therefore abandon the whole process, and leave international meetings to bilateral or multilateral sessions as the need arises? Alternatively, should the regular gathering be either broadened or slimmed? Instead of eight, why

Genuine difference

Abandoning the meetings would not be sensible. Jaw-jaweven of an inconsequential sort. is better than the alternative. And, for all the cynicism, there have been summits that have made a genuine difference -Tokyo in 1993, for example, when the historic breakthrough in the Gatt negotiations was reached. Furthermore, the summits are a useful way for the rest of the world to remind an increasingly sceptical US public of its global leadership obligations.

The membership of the regular meetings is a trickier question. A G3 would make little sense for discussions outside the realm of monetary policy. Fiscal policy remains a matter for national governments and legislatures. Exchange rate policy is mostly a matter for governments, rather than central banks. No European leader is yet in a position to speak for his continent on much else of substance.

A G9 that included China might be worthwhile, but would raise legitimate questions, especially in the US, about human rights. Anything bigger gets hopelessly unwieldy. And. though to outsiders the spectacle of a privileged group of big economies looks anachronistically exclusive, it has one strong argument in its favour. As the Asian crisis has proved, these are the countries that still dominate the world economy and have much the longest purses when a bail-

So the answer is to stay with Moreover, with the advent of the current structure, for the good reason that there is not a better one, but improve on Mr Blair's reforms by focusing it even more parrowly. Slim down the supporting cast further; clear the agenda of ideological clutter: let the leaders genuinely review the world economy and suggest ways of improving it.

One sign of this new commitment to businesslike behaviour would be for the leaders to express their communiqué concisely, with explicit goals and specific commitments. That would underline their claim to global leadership.

Trouble for the

smiling general

The Indonesian leader may need more than cunning to control the rioters in his kingdom, says Sander Thoenes

Suharto sent a wreath to the funeral of Arif Rachman Hakim, a student who had been killed in clashes with the palace guards of the then President Sukarno. The killing whipped up popular support for the protesting students and allowed Mr Suharto, whose public stance earned him the nickname of "the smiling general", to overthrow and replace Sukarno.

Mr Suharto has yet to send a wreath to the parents of the six students who were shot in a mysterious incident on Tuesday, just as peaceful student protesters prepared to return to their campus. Nor has any ambitious rival general. But the student killing has proved an eerie rerun of 1966. Except it is worse.

Mr Suharto returned home to a ourning capital yesterday. Many of the glass towers that bear testimony to his success in boosting the Indonesian economy stood shattered by stones. Shopping plazas that had reflected the growing prosperity of his citizens had been looted, or turned to blackened ruins, or both; more than 100 people had been burned to death inside one of them. bringing the total number killed in four days of rioting to more

It is worth remembering, at a time when images of protest and death haunt the world's screens. that Mr Suharto's rule has elicited praise in the past, in his 32 years of rule, he has managed to hold together a country of 17,000 islands, with a population of 200m (the world's fourth largest). He was instrumental in developing the Association of South East Asian Nations (Asean), which is now a key regional body, and he opened up Indonesia to foreign investment and high economic

Before the past year's economic collapse, growth in income per head had averaged 4.6 per cent since 1965, increasing per capita income from \$270 to \$1,080 tin 1996 dollarsi. What is more.

here was a story last year about a man who turned up at the gaming tables in Las Vegas for the first time. He won about \$286,000, cashed in his realised, do not go on forever and he had the sense to quit while his

going was good.

Why can't politicians be more like that? Two examples come to mind this week. President Suharto of Indonesia and Chancellor Helmut Kohl of Germany operate in entirely different political systems. but have something in common: their great achievements seem to be behind them. The question is, how do they leave office?

n 1966. Major General though a small number of fami-Suharto sent a wreath to lies close to the president have indonesians use most often to enriched themselves mightly, a good deal of the growth has trickled down to the farmers of the most populous islands of Java

> Most of the symbols of Mr Suharto's economic success, the hospitals and schools, the roads power stations, are still standing. Even in the midst of economic crisis most Indonesians are clearly better off now than they were when he swept to power. But few in Jakarta still use the honorary title bestowed on him by government propaganda. Father of Development.

> Instead, the rioters and student protesters called him "King of Thieves". They set fire to cars (the Timor and the Bimantara) produced by his sons. They attacked the offices of his daughter, who is both a minister in the cabinet and a prominent businesswoman. They ravaged branches of the country's largest bank, BCA, jointly owned by two of Mr Suharto's children and his friend and lifelong business partner, Liem Sice Liong, one of the several prominent Chinese tycoons who have been closely linked to the president through out his time in office.

> So where did it all start to go wrong? In the west, people point to failed economic policies over many years, leading to overborrowing by Indonesian companies and massive corruption (not least by Mr Subarto's own family). For Indonesians themselves, however. Mr Suharto appeared to lose his aura of good fortune after the death of his wife in 1996. Her blue blood compensated for his peasant background. And it was she Without her. Mr Subarto has appeared unable to control the business activities of his children. five of whom, plus a half brother, cousin and hundreds more have piggybacked on family ties to build a sprawling busines empire that has become Mr

describe his government. The president has appeared unable to keep it within politically acceptable limits or, it seems, to understand how much it is resented.

MAN IN THE NEWS PRESIDENT SUHARTO

That may help explain why foot soldiers, even crack troops could be seen chatting away with looters. Even if the top brass, mostly hand-picked generals who used to serve as his adjutants, appeared to remain loyal, their hold on the lower ranks seems tenuous. Numerous former aides have joined the opposition and yesterday a faction of Golkar, the obedient political party he set up to dominate parliament, abandoned ship as well.

Mr Suharto still managed a wan smile when news of the riots reached him in Egypt. He is a proud military man and, if he keeps control of the army, he might just succeed in reimposing order. But it looks

The military is only one of Mr Subarto's sources of support. Even his worst enemies praise his skills in the ancient Javanese art of political patronage and manoeuvering, which have enabled him to take on the air of a pandithu ratu. a wise traditional ruler. "He is much more of a court-based king than a constitutional ruler," says Heather Sutherland of the University of Amsterdam. "He regards himself as the saviour of the nation."

Rather like Boris Yeltsin, Mr Suharto is a master in the art of keeping friends and foes guessing. Few Indonesian or foreign observers knew with certainty why he appointed the whimsical B.J. Habibie as his vice-president. who held the family together. and his daughter and other cronies to his new cabinet, or why he wavered between co-operating with and cheating on the International Monetary Fund in eight months of negotiations over the economic crisis.

Even indonesians were wrongfooted when Mr Suharto toyed you feel if I stepped down?" says with resigning earlier this week. One Hok Ham, a prominent his-

could lead from behind," he said. "I could become a pundita [a sage]." To some, that suggested he was ready to step aside and take on the role of senior statesman, much like Lec-Kwan Yew, former prime minister of Singapore and now its senior minister. But the words may have been

disingenuous. "There is a tradition among Javanese leaders to ask their followers, 'How would

turnan. "But anyone who would dare tell him to step down will lose his head. So nobody does."

If Mr Suharto is indeed playing Javanese games in the midst of riots, it would be an extremely risky ploy. "Such remarks should weaken support for him in his inner circle." one diplomat says. "If the old man is not serious about his job, who is?"

"(Subartal is very cunning." concludes Mrs Sutherland "But not clever enough to realise things have gone too far.'

the euro could still be undermined.

They never can say goodbye

Malcolm Rutherford on the leaders who fail to quit when the going is good

You can be thrown out by the ballot box or by a revolution in the streets, depending on the prevailing political system. France sometimes tries to have it both ways: when President Charles de Gaulle stayed too long, there was an uprising, and he went.

Suharto's biggest liability.

In Indonesia. if Mr Suharto goes he would leave office in the same way that he entered it: after students' riots and widespread violence (albeit nothing yet on the

scale of the slaughter that brought him to power). As the article above shows, between then and now, he initiated a great deal that was good. Why should such a men stay on until shrouded under a cloud of corruption and worse?

Helmut Kohl is arguably the most successful European politician of the second half of the 20th century. He has presided over the peaceful unification of Germany and contributed to the introduction

of the European single currency. That much is clear. What is less so is what more there is for him to do. Yet he wants to stand for re-election in September. No one can know in advance what will happen - the German electoral system is complex - but there is a

strong possibility he will lose. Both could argue that things would be much worse if they were to go: Mr Suharto might say the enarchy could grow: Mr Kohl that

Obviously, neither could prove it. Three lessons apply to different systems. Quit while the going is good. Always try to groom a Thatcher did not. And try to have fixed terms for leaders. If the Americans had not introduced a two-term limit for the presidency Ronald Reagan might have stood again in 1988, won the vote and then been found wanting in the job. Chancellor Kohl still has just about time to say that he will not be running in September and prepare the way for a successor His good deeds are already recorded.

LETTERS TO THE EDITOR

India: turning point in nuclear arms race

From Dr Scilla Eurorthy. Sir. The reactions of the UK and other western governments to India's nuclear tests could be more honest and constructive. First, they could not have been surprised by the tests. For years the Indian amhassador in Geneva, Arundhati Ghose, made herself extremely unpopular by saying repeatedly to the conference on disarmament that the five nuclear weapons states must abide by their undertakings. made nearly 30 years ago, to make serious moves towards nuclear disarmament. She warned that if they do not do so. other nations could no longer be expected to continue to uphold their undertakings not to develop nuclear weapons. India had made

o such undertakings. and non-state actors. Potential 51 Plantation Road. Early last December, and again protiferators may now take their Oxford OX2 6JE. UK no such undertakings.

Parsifal and the goalie

Patrick Harverson reveals plans for a European soccer league for top clubs

t is codenamed Project Parsifal and is a bomb that could one day explode under European football. The project is proposal for a new European club competition. Under it, the likes of Ajax, Juventus, Barcelona and Liverpool could find themselves playing each other regularly, week after week. The proposal is being put ether by Media Partners,

a Milan-based sports market-ing consultancy that advises the top Italian Serie A league on television contracts. The firm is proposing a midweek league made up of either 24 or 32 clubs, which would be chosen partly on status and partly on merit. Under the scheme, a group

of founder clubs would enjoy permanent membership of the league by virtue of their size and wealth - an idea that is anathema to those who believe European competition should be linked directly to clubs' performance in their domestic eagues.

It would be the first fully fledged pan-European league, in which all clubs play one another. More than that, it might one day make the arrangements of European football, in which clubs can move up and down into more like the US system, which puts a premium on almost certainly provoke a battle royal with Europe's

existing football authorities. The money to back the league would come from broadcasters, financial institutions and corporate sponsors. The revenues generated for the participating teams would, the plan's proponents say, dwarf the amount clubs currently earn from the Champions League, Europe's (and the world's) premier club competition. This is a hybrid between a league and a knock-out competition (as is the World Cup), and is organised by Uefa, the continent's governing body of

League generated £99m and be relegated and go stable than the old USures will have risen since great fun." then, because of the increase doctrines that they did not in the number of clubs in the competition from 16 to 24. Media Partners believes the clubs that take part should be earning much more, "The of conventional force. Each way [the Champions League] is formatted today, it is an underperforming asset. We believe we can do better," ing for "mutual assured says Rodolfo Hecht, the execin fact mad but stabilising. utive masterminding the After armed confrontation super league project at over Berlin and Cuba, both Media Partners.

The firm hopes to complete its proposals this summer before unveiling it publicly. What happens then is the question that could determine the future of European club football in the next century.

ous hitter, bilateral rivalries Will Parsifal first be presand territorial disputes. ented to Europe's biggest which could trigger serious clubs for their support, and incidents. These disputes will they take it seriously? If focus on the Punjab (India support is forthcoming, will and Pakistan) and the Himathe league be presented to Uefa as a fait accompli that True, Nato and the Warit must accept or face the saw pact were at ideological leading clubs? Or will Media never involved in regular Partners go to Uefa first, in a requirement to maximise border skirmishes along the the hope that it will approve roof of the world in the Parsifal, thereby guarantee-

ing the clubs' support?

Silvio Beriusconi, the media magnate who owns AC Milan, publicly supports the idea of a super league and is likely to be aware of Media Partners' plans. Other Italian clubs are also believed to be supportive.

Outside Italy several top clubs, among them Ajax of the Netherlands, Liverpool and Barcelona, are regarded as keen on a super league that would provide a guaran-teed flow of big money from regular European competi

Others, however, appear more circumspect. Manches ter United and Bayern Munich are thought to believe that any restructur ing of Europe's elite club backing of the governing body, and would not be willing to risk the expulsion from their national football almost certainly threaten if there were a breakaway.

Yet if it came to a fight between Uefa and the organtition, the latter might win. James Dow, who co-authored the recent survey on European football by accountants KPMG which predicted that a super league would be set up by 2002, says: "The European Commission is likely to take a supportive view of stability. But it would anyone trying to form a new league. It would not be in favour of the football authorities exercising a monopoly over the operation of

Indonesian civil strife hits m

WEEK IN THE MARKETS By Gary Mead

Civil strife in Indonesia sent coffee futures soaring initially on the London International Financial Futures and Options Exchange yesterday, where the July contract broke through the \$2,000 a tonne barrier and reached \$2,130 its highest point since June 4 1997 - within two minutes of opening for business.

But it was a rollercoaster ride for coffee traders, as the July contract collapsed and lost \$250 in the afternoon session, finally closing at \$1,880, a \$100 loss on the

of late, with a total of 9,471 lots. Specialists said speculators had taken advantage of the news from Indonesia as had trade sellers, and the uneven day owed little to fundamental

Cocoa futures also moved to a new high on Liffe, the July contract touching £1,165 tonne, though it closed at £1,156, a £6 gain.

Traders reported that there were strong indications of a growing bull market, with buyers entering the fray whenever the price dipped.

Palladium spiked to a new cents lower.
record high, the London With US ounce prompted by furdelays in exports from term.

September 1999 contract falling 6 basis points. The money market is now pricing in a very high chance of packages. Tokyo will wait to see their effects before it tries anything else.

However, an unexpected 0.7 per cent jump in Portuguese and expects rates to fall below their present 7.25 per cent only at the start of 1999.

Ms Malmgren adds that Japan's will to intervene is also diminishing. "Only one

from this weekend's Group of Eight summit in Birmingham, the UK.

This is partly because presidents and prime minis
The Czech koruna continued to rise, although analysts warned that jitters presidents and prime minis
The Czech koruna continued to rise, although analysts warned that jitters ahead of next month's gengist at Bankers Trust in London who talks often to the level the finance minis-

think they will draw a new line in the sand at Y140."

Support intervention for the Japanese currency, she says. Support intervention for the Japanese currency, she says.
That is because Robert Economics in New York.

The US believes that the yen will recover only when the Japanese economy comes to life. According to Ms Malmgren, Mr Rubin accepts that Tokyo will do nothing more for now to make that happen. She says

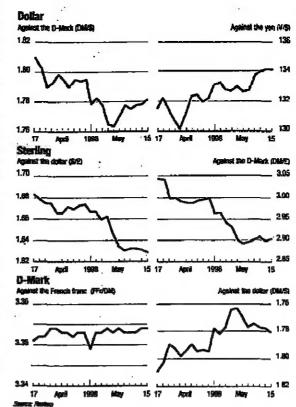

CURRENCIES & MONEY

yesterday on signs that it would receive little help in the future Eurozone of Eight summit in Briming.

The yen sind further sures in peripheral European asso dimensions. Unly one part of the Japanese government supports an intervention policy at all, and that's the UK.

The czech koruna continuation of the Japanese government supports an intervention policy at all, and that's the UK. gist at Bankers Trust in Lon-don, who talks often to the level the finance minis-washington and Tokyo offi-try wants to defend, I still

That is because kooert Rubin, US treasury secretary, is keener on helping the bond market by keeping the dollar strong than on the leacing Tokyo by letting the says. The indo-

## **Bid hint** Ladbroke

COMPANIES REPORT by Slave Thempses

Ledbroke was Footsie's top performer, building on a their customers fairly strong relative performance throughout the week amid renewed speculation that the long-rumoured takeover or merger with Hilton Corporation of the US might soon FTSE 100 index. happen.

Dealers said there were other positive factors behind the surge in the shares. Initially, they said the market \$11.45. had given a warm response to the trading update released at the annual general meeting on Monday that outlined increased margins

across its businesses. And dealers said the marstock after the big institutional buying order on Thursday, said to have been 7m shares or getting on for one per cent of the company's issued capital, executed by Dresdner Kleinwort Ben-

At the finish of the session Ladbroke shares were 15% higher at 357%p, on turnover of 1.2m shares. News of the Office of Fair

Trading's investigation into Northern Rock's recently restructured savings boosted by a strong pus accounts carved lumps off the telecoms team at A the Northern Rock share sell-off of the whole banking motor. The widespread weakness

The widespread weakness in the banks was instrumental in driving the FTSS 100 index sharply lower; banks represent in excess of 20 per Commer Scots represent in excess of 20 per ent of the index.
Northern Rock bors the runt of the selling pressure investment leads cent of the index. brunt of the selling pressure which enveloped the sector, dies its shares sliding more than Tools 10 per cent at one point, the less on the see

down to 540p, in heavy turn-over. They later rallied to finish a net 51 or 8.4 per cent FTSE 350 off at 555p.

Long gitt/equity yid ratio

The OFT's investigation follows a move last month by Northern Rock to switch thousands of its customers into three new bank More Focus
accounts, delivering lower LE Sports accounts, delivering lower

rates of interest. Other banks badly affected FALLS by the general warning to the banking industry to treat included Lloyds TSB, whose shares dropped 32% or 3.6 per cent to 861p. The fall in Lloyds TSB shares alone took almost 10 points off the Amro, who shifted their stance on the stock from

Bank of Scotland dipped 28 to 690p, Woolwich 6% to ing a price target of 800p. 339%p, Abbey National 34 to ABN upgraded its sum-of-£10.47 and NatWest 23 to the parts valuation to \$50p a

### Telecoms buxx

Colt Telecom was the star of the telecoms sector, racing up a further 145 to £20.85, still on the back of recent ket had been left short of good figures and amid take-

> off worries associated with stock for a client. the continued turbulence in rounding the company. C&W shares maintained their fen breast cencer treatment. recent good performance ishing the day 20% high

## High techs put early drag on Dow

worries about semiconductor producers put a drag on US shares at midsession, writes John Labate in New York

National Semiconductor warned late on Thursday that profits were likely to be lower than earlier expected in the coming quarter. National's shares tumbled more than 17 per cent to \$161 while Hewlett-Packard, which issued its own warning on Wednesday, was down \$% to \$6914.

"I think there's a lot of concern now for profits in the second quarter," said Hildegard Zagorski, stock market analyst at Prudential Securities in New York.

By early afternoon the Dow Jones Industrial Average was 14.95 lower at pleted the C\$590m purchase 9.157.38 while the broader Standard & Poor's 500 was down 2.65 to 1,114.72. In afternoon trade, declining stocks narrowly led risers by

Semiconductor shares were sharply lower on National's warning and after morning comments by a top Merrill Lynch analyst about overcapacity in the industry. Intel's shares were down \$3% to \$80%, while Advanced Micro Devices plunged \$1#

Weakness throughout the tech sector sent the Nasdaq composite down 9.91 to 1,855.45. Dell Computer lost \$4 to \$91\%.

Among the most actively shares rose after it said it would issue new stock and or 0.4 per cent, to 666.82.

debt offerings. The stock was \$1# higher at \$43. Merck climbed \$11 to \$119 after regulators approved one of its drug products.

Bond prices inched higher after the release of industrial production figures. The earlier in the week. benchmark long bond rose 🕏 to 102 s. sending the yield lower to 5.969.

The Russell 2000 of small cap shares lost 1.08 to 474.47. TORONTO was higher early in the session as bullion rose above the \$300 threshold, but positionsquaring in most of the market's 14 sub-indexes pared the gains subsequently and by midsession the TSE-300 composite index was just 2.74 higher at 7,680.60.

Gulf Canada Resources picked up 30 cents to C\$7.05 on news that it had comof UK North Sea's

SAO PAULO edged higher in spite of the social unrest in Asia and the liquidation of two small banks. The Bov-

espa index rose 55 to 10,789. The central bank was reported to have started liquidating assets of two small banks - BMD of São Paulo and Banco Brasileiro Comercial of Goias. In spite of the market's

rise, investors are also to developments over the government's privatisation sion reform BUENOS AIRES gained

marginal ground although traded shares. Owens-Illinois trading volumes were low. The Merval index rose 2.46,

## Bourse hunts bargains

### **SOUTH AFRICA**

Bargain-hunting by local institutions sent Johannesburg higher late in the day. The overall index closed 84.8 higher at 8,054.1, financials gained 92.7 to 13,705.8, industrials were 34.0 better at to 1,034.4.

the winners. De Beers climbed 980 cents to R119. IBM South Africa traded 210 cents higher at R9.15 on a proposed minorities buyout by the parent company.

Speculative trade drove hospital group Excel Medical

# Dollar nudges cautious Frankfurt higher

### EUROPE

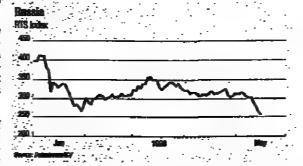

A stronger dollar and the day's US economic data provided some support to an otherwise cautious FRANK-FURT and the Xetra Dax 300 index closed 40.20 higher at 5.414.31.

Among the day's movers, construction group Hochtief jumped DM4 to DM84 as Hypo-Bank raised its recommendation on the group which announced an 8 per cent rise in 1997 net profits Retailer Karstadt climbed

DM,33.55 to DM867.50

although dealers could not point to any news to explain The banks were in focus as Dresdner Bank announced a 23 per cent rise in first-quarter pre-tax profit. Dresdner put on DM2.75 to DM104.05

and Deutsche Bank added DM1.25 higher to DM159, but Commerzbank was 15 pfg lower at DM70.10.

over events in Asia, and Wall Street's dull early performance, made investors funds. The CAC 40 index closed 21.75 lower at 3,990.23.

Dassault, however, put in a star performance, finishing FFr156 or 9.2 per cent higher at FFr1,858 on news that the government was to transfer its 46 per cent stake to restructuring of the European aerospace sector. The heavily traded Elf

Aquitaine hit an intra-day low of FFr866 after the company reported a 12 per cent decline in first-quarter sales, reluctant to commit fresh but it subsequently recovered some ground to close FFr16 lower at FFr874. Total lost FFr4 to FFr792. Accor, a strong market

## WorldCom head retires

Colin Williams, WorldCom's European chairman, has retired from the acquisitive US telecommunications group, leaving Liam Strong in sole charge of all the company's operations outside continental America

He had been withdrawing from day-to-day management since Mr Strong's surprise appointment as head of WorldCom's international division in October last

Mr Williams, 58, said it was the third time he had "retired" in 15 years. A 25year veteran of the telecommunications industry who has held senior posts at Plessev. Pirelli and British Telecommunications, Mr Williams said he expected to become involved in "the odd

Since making known his availability, "the phone has been ringing off the hook". He would remain a substantial shareholder in the com-

rejected industry rumours of a clash of management styles. Mr Strong said: "It is difficult to have a clash of styles when you are doing different things."

Mr Williams pointed out that he had recruited Mr Strong to the lob. He said WorldCom was at a stage in its development where it needed the organisation and business discipline that Mr Strong was injecting rather approach: "A growing com-pany needs different skills at different times," he said.

Mr Strong who will report directly to John Sidgmore, WorldCom chief operations officer, was a controversial choice, having little telecome experience and having endured harsh criticism from investors and analysts the Sears retailing group. Yesterday, he said he was

enjoying the challenge: "The company is great. I would defy snyone not to enjoy the telecoms industry."

## Finance head leaves Servisair

Servisals, the alroraft and ground-handling company, yesterday announced the departure of David Cranmer, itsfinance director, after a series of disappointments for the company. Servisair's shares were badly hit in January when it issued a profits warning, its full-year profits fell slightly in the year to December 1997, after it was hit by technical account-

ing changes. Mr Crarmer is to be replaced by Jeremy Coates, group finance director of Owen Williams Group, the consulting enginear. He was previously in a number of senior positions at

NFC, the logistics company.

Mr Cranmer is expected to receive a full year's pay of £110,000 in lieu of notice. He resigned as a director and leaves Servisair at the end of this month. The shares were unchanged yesterday at 2821/rp. Robert Wright.

SECURITIES FOREIGN COMPETITION AND LOWER STOCK MARKET VOLUMES LEAVE MID-SIZE HOUSES IN RED

## Big Bang' hits Japanese brokers

medium-sized brokers announced dismal results yesterday, illustrating the pressures on the sector as the country's Big Bang financial deregulation gets under way.

Employment in the securities sector fell 10.5 per cent last year, to 98,516, because of job cuts and the closure of several brokers. Staff levels in the industry are now 41 per cent below their peak

brokers recorded pre-tax losses in fiscal 1997, which

Maserati costs

The industry's problems stem from the fall in stock market volumes and the wave of foreign competition ushered in by Big Bang. This is expected to intensify this year. Merrill Lynch, the US broker, is developing a distribution network after purchasing some outlets of Yamaichi Securities, Japan's fourth largest broker, which failed last November.

\$2bn order

tis higher

Ferrari, the legendary sports cars manufacturer owned by Italy's Fiat automotive group, yesterday reported a sharp increase in 1997 pretax profits and sales. But it warned that earnings this year would decline because of the costs of relaunching Maserati, the troubled company which once challenged it on the Formula One rac-

ing circuit. Last year, Flat transferred control of Maserati to Ferrari to engineer the recovery of the company. Luca di Montezemolo, Ferrari chairman, said vesterday that he expected Maserati to return to profit in four years time after its relaunch this year.

Maserati produced only 700 cars in 1997, reflecting in part Ferrari's decision to shut down Maserati's plant for six months. After a complete re-engineering, the Maserati plant reopened at the end of March and is expected to produce about 1,000 cars this year, including a new coupé to be tained a high rate of introduction of a Formula

Show in September, We intend to keep Ferrar and Maserati as two separate

and distinct companies," explained Mr Montezemolo "While Ferrari will maintain its unique and exclusive characteristics, producing no more than 8,500 cars a year, we see Maserati becoming a sort of Italian-style Jaguar,"

The target for Maserati was to produce 6,000 cars a year by 2002 or 2008, with "a good range of products and worldwide presence, including in the US", he said.

Maserati had to abandon the US market because of legal problems under its previous ownership, but Farrari is now preparing to relaunch the marque in the country. Last year, Ferrari saw its

sales top L1,000bn for the first time in its history, with revenues of L1,044bn (\$594m)compared with L878bn in 1996. Pre-tax profits rose sharply, from L12bn in 1996 to L87.8bn last year. The company also mainresearch and development spending, at 15 per cent of gross annual revenues. Mr Montezemolo said the

company expected to remain in profit this year in spite of Maserati relaunch. The company is budgeting for a pre-tax profit of about L20bn this year and production of 4,500 cars, including 3,500 Ferraris and 1,000 Maseratis. Ferreri plone should achieve pre-tax profits of about L60bn in 1996.

Mr Montezemolo added that Ferrari intended to maintain an edge on its new competitors by staying in the vanguard of technological developments gleaned

Mr Montezamolo said the

One gear box on the F355 sports car was likely to lead to "a revolution in the way he suid. you will drive cars in the

With the Ferrari F1 gear system, drivers change gears by pushing buttons on the steering wheel but also have the option of driving the car as if it were a standard auto-

The system was developed in co-operation with Magneti Marelli, the Flat car components subsidiary, which is now expected to sell the system to BMW. Flat is also introducing the new system for Alfa Romeo and some of its other cars.

Mr Montesemolo gusshed seek a stock market listing. end and myth and that is "It is an issue that involves good for sales."

my shareholders, but there are no plans and I don't think it makes any sense,

As for the eventual return of Maserati to the racing circuits, he said it was still too early to say. "But in any case it certainly won't be in Formula One".

While Michael Schumacher tore round the Ferrari test track practising for next week's Monaco Grand Prix. Mr Montezemolo noted that there was no correlation between Ferrari's performance on the racing circuit and its commercial sales.

"If anything, when Ferrari loses we tend to sell more cars. But the F1 activities speculation that Ferrari may adds fuel to the Ferrari leg-

## Goldminers reach deal on Driefontein control

with 40 per cent. Driefontein

would then be delisted.

The Anglo American group and its rival Gold Fields yesterday reached agreement on the future of South Africa's rich but long-disputed Driefontein Consolidated gold mine. The deal will unwind one of the last big crossshareholdings in the South African gold mining indus-

industry," said Brian Gil-bertson, Gold Fields chairman. "It's been a business that has involved a great deal of tension and antagonism for many, many years." A joint venture will be stablished to manage Driefontein, with the interests of Gold Fields and Anglogold the newly created gold mining arm of Angio - represented in a ratio of 3 to 2

of the mine and Anglogold

"Driefontein is the North-

ern Ireland of the mining

Assuming the minorities are bought out, this will leave Gold Fields with 60 per cent

The two sides agreed the mine would be managed as an independent operation. and that important business decisions - including the appointment of a chief executive, the approval of the annual business plan and hedging policy - would require unanimity between Gold Fields and Anglogold.

The deal resolves the conflict of interest for Anglo American in controlling Anglogold and simultaneously owning 23 per cent of Gold Fields of South Africa (GFSA), the parent of Gold Fields. GFSA will divest its holding in Gold Fields to shareholders, including Anglo. Anglo will use those shares to increase its stake in Driefontein from the current 21.5 per cent. Gold Fields now controls 41 per cent of Driefontein.

"This is the breakdown of the greatest pyramid and cross-shareholding in the South African gold mining industry," Mr Gilbertson said.

Both Anglogold and Gold Fields are untangling the complicated shareholding structures that grew up under apartheid. The two companies want to make themselves attractive to institutional investors by becoming focused, high-quality gold mining groups.

the industry for the poor performance of Driefontein in the past, will be left with a coal, copper and platinum mining and a range of investments in other South Mr Gilbertson said he

## France and EU agree rescue terms for Crédit Lyonnais

Government must reduce stake in bank to less than 10 per cent

### By Andrew Jack in Paris and Some Internation to Emparis

The French government and the European Commission have agreed the terms of a new rescue plan for the long troubled French bank Crédit Lyonnais, clearing the way for approval of the largest state aid package ever submitted to

The deal, which still would force the French state to cut its stake in the bank from 82 per cent, held directly and indirectly, to less than 10 per cent by October next year, ending a period of public control which began in 1945.

required to more than double the FFr310bn (\$51bn) in asset disposals to which it had agreed under the terms of a previous rescue plan in 1995. The new sales are expected to include that of its Belgian subsidiary before the end of this

In exchange, the Commission, the European Union's is set to approve the rescue requires the formal vote of the package. The plan has trig-Commission next Wednesday, gered criticism of competitive distortions from its banking rivals, and officials estimate it may ultimately cost the French taxpayer FFr120-145bn. Commission officials were confident yesterday that the plan would be approved. "A lot

a very short time," said one, He added that a detailed list of disposals, which would remain ted shortly.

Brussels had threatened to veto a new rescue, and details were only finalised on Thursday evening following discussions between Karel Van Miert, EU competition commissioner and Dominique Strauss-Kahn, the French economics. finance and industry minister

The French government persuaded Brussels to back down from its original demand that all of Credit Lyponsis' European assets outside France should be sold. The bank will be able to retain its London, Luxembourg and Swiss

pean assets worth FFr629bn, and a further FFr64bn in Asia businesses such as those in Janan and Singapore are believed to have been pro-

tected from disposal. In addition, Credit Lyonnals will be required to continue to branches in France. Other domestic assets worth FFr27bn will also be sold.

The way in which the bank will be privatised has also been left open, leaving the French sovernment free to allow several different sh holders to take stakes if it chooses, rather than launch a trade sale to a single buyer as

customers are vigilant. Finthermore

When the Group of Seven grands world seemed a safe place. The devaluation of the Thai baht, which started Asia's financial crisis, was still two weeks away. US triumphaliam was almost forgiveable. For most investors, it was also prelu ing bond yields and rising share-piles. The S&P 500 is up 24 per cent while European shares have risen 57 per cent, in dollars. The unhappy exception, of course, is Asia, including Japan: down 34 per cent.

The mood at this weekend's Bire altogether more sombre. Turnsoil in Indonesia and India's nuclear bomb shell have been sobering reminders of the political risks, while the economic outlook in the largest countries - Japan, China and Koras - is

What are investors to make of this? The good performance of the Philippines is evidence against regional contagion. On the other hand, havens such as Hong Kong and Singapore have suffered. They are almost certainly victims of their own liquidity - regional fund managers needing to raise funds sell where they can. Still, it shows how hazardous it can be trying to sepa-rate the good from the bad.

Can the G7 do anything to avoid Asia's mishaps being repeated? One critical area is working wit how to discourage unhedged for their converse unhedged for their cone on a large scale, they create unleceptable systemic risks. If the G7 makes prog ress in this area, the trip to Birming ham will not have been in vain.

While thousands of individuals are

still smarting over Northern Rock's

train companies are good now. But they could sour. The negotiating strength of the Roscos when the next round of franchising happens, and rival train biddens line up to secure lessing deals, could be say, price-caps and hammered out by the industry, should deter anti-competitive behaviour. But it would also be fiexible enough to reflect changes in the industry. Current leasing hampered by full-scale regulation, which yesterday's report lists as last recort. The risk is that the politicians override these recomm tions in next month's white paper on

## Unilever pension fund drops MA

### By Jane Martinson in Brighton and William Lowis in New York

Mercury Asset Management, the UK's largest fund manager now owned by Merrill Lynch, the US investment bank, has been dismissed by the pension fund of Unilever, the consumer

The move, to be announced next week, follows recent poor performance by MAM in managing the £1bn (\$1.7bn) Unilever fund. It will be a blow to MAM, which also looks likely to lose about 2600m from two

itors are likely to use the dismissal to exploit concerns in the UK market about changes at MAM following its takeover earlier this year by Merrill

Rival investment fund managers said the underperformance last year of some of MAM's funds and the resulting loss of business brought into Lynch's 23.1bn takeover. investment performance at

MAM has traditionally been volatile, with wide differences between the results achieved Unilever appointed MAM II by different fund managers at

moved to address this issue by reorganising the Select team that manages the large pen-alon fund clients. MAM said last night: "We

have a quite respectable performance for Uniterer over the 11 years. There was a short-term performance issue over 18 months to the and of March. Had Unilever stayed with us since the end of March the performance would have been quite good as it has picked up quite positively over the past two months."

Unilever is understood to be considering legal action

legal action has been taken, nor is any pending." Wendy Mayall, Unilever's head of ment; Merrill Lynch also declined to comment Unilever is one of three large

Unilever said yesterday: "No

MAM clients understood to be unhappy with last year's investment underperformance. MAM is also set to lose 600m from the \$1.5m it map ages for the pension fund of J. Seinsbury, the UK retail group; and has already lost 2300m. from a fund managed against MAM for a 10 per cent . for the pension fund of Zeneca,

## Blow to VW as New Beetles recalled

Volkswagen's aura of near-invincibility was pierced yesterday after Europe's biggest carmaker said it was recalling all the 10,100 New Beetles built so far.

The recall, not uncommon for a new model, will come as delirious public reception for

or the the

This was a top secret mission. The agents draped a dark cloth over the glass door to keep the light from attracting attention. But, as they tampered with the equipment, the operatives were so clumsy, so unprofes sional that a first-floor resident was woken by the racket. She called the police, who, handily, were on duty at the station just 500 metres down the road. The "intruders", with their electronic equipment, were caught cold, though one, fooling nobody, feigned a heart

attack. Bad plot for a B-grade film? A rejected storyline from Mission Impossible? The "intruders" were agents of Mossad, Israel's revered secret service, and they were

spying in a friendly country "You can't imagine the incompetence," said a senior western diplomat. "Mossad should have known there is a policeman in every Swisa." Six months earlier,

another set of Mossad agents were caught in the Jordanian capital, Amman, in equally embarrassing cirumetances. Khaled Meshal prominent member of Hamas, the Islamic resistance movement, was entering his office when an opera tive struck him on the ear it was an attempt to inject a slow-acting poleon. Meshal's chauffeur, used a newspaper

The agents didn't know they were being pursued, so they abandoned their carafter 300 metres, allowing Meshal's bodyguard and a plainclothes policeman to overpower than. Their story was that they were Canadian citizens and they had the passports to prove it. "If these guys are Canadian then we are Japanese," quip-

ped a Canadian diplomat. What was Mossad doing, trying to assassinate Meshal in broad daylight, and in Jordan, one of Israel's most loyal Arab allies, and using passports from another friendly country, Canada? How could Benjamin Netanyahu, israel's prime minister, sanction such a miscon-

ceived operation? The basic rules in any intelligence agency are the same. Do what you have to do, but don't get caught. Over the past nine months, Mossad has done little right. Maybe it was just acci-

dent-prone. Maybe it was not evaluating its intelligence. Whatever the reason, foreign intelligence watchers said it was hard to understand precisely why Mossad had lost and talks us we never

hear about the successes. That's true. But what about the failures that show real amateurism and errors of judgment?" said another dip-Some former Mossad

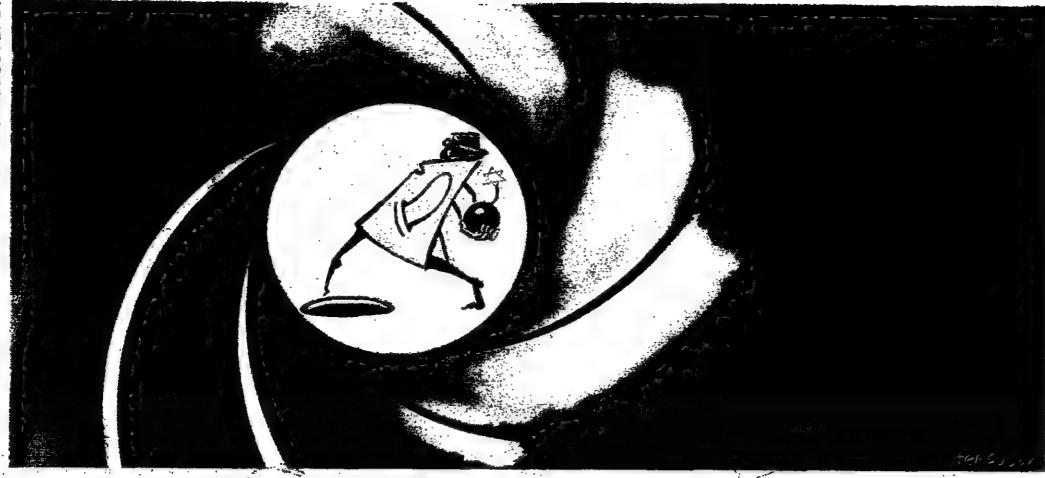

agents believe part of the agency is still living in the days when Israel believed the world was against it which meant we could do whatever and wherever we wanted," said E, a former agent. "We know it's different now. Agencies from friendly nations co-operate much more with each other. The point is Mossad is in transition. It needs a sense of direction.

Like the stalled peace process with the Palestinians, Mossad is in limbo, not sure

in the gossip columns, but politics offers a different path to prominence'

Mossad, Israel's legendary espionage agency, has suffered a series of embarrassments. Judy Dempsey assesses why

of the strategic interests its - E explained how Israel was pursue. "It's clear the planning for Methal's assessination should have been stopped in the early stages;" said A, who describes himself as a reservist Mossad agent. "It is not in our interests to destabilise Jordan's

King Hussein." Netanyahu did not consider any postponement. ed with terrorism and the need for israel to continue to act against those who seek to harm Jews, "wherever they may be", he sanctioned Meshal's assassi-

"A conceptual fixation afflicted Mossad's planning." concluded the government commission set up to investigate the botched operation. "The possibility of fail-urs ... was hardly ure . . . was hardly addressed." Mossad believed

it was infallible. Diplomats say the agency. and indeed MI, Military intelligence, and Shin Bet; the internal general security services, have, in recent months, been torn between maintaining their professional integrity and bowing to pressure from an aggressive government.

Last month, for example, during a weekly cabinet meeting, Ami 'Ayalon, head of Shin Bet, told ministers how Yassir Atafat, Palestinian Authority president, was cracking down on terrorism. Limor Livnat, communications minister, dismissed such an assessment. st which point Ayalon hit back-"Don't expect me to recorf to

to bear.

In 1948 when the State of Israel was established; the strategic goals of intelligence gathering were more clear-cut. The cold war divided the world into ideological camps. But, for israel, it was more complicated. It was a country born out of the need to survive and to prove itself. "In those years," said E.

"the world was against us."

political masters want to like Rest Germany. Both of us were parish states. Both of us had much to prove. Our survival was at stake. We set our own rules."

The rules were dictated by the necessity to defend the fledsling Jewish state, "We were surrounded by hostile Arab states whose only aim was to destroy us," said E. "It strengthened our

resolve to form intelligence services which would foil attacks on our new state-it was an era of great reckiessness. We were accountable very few. The media, unlike now, was censored."

Washington and European capitals were ambiguous

'If you bring me a MiG-21, you will have done a good day's work.' Mossad took up the challenge

towards the new Jewish state. And they were also sceptical about Mossad, founded in 1949 initially to monitor and foil sitempts by Arab neighbours to acquire weapons which could be

nged begingt Igrael. But Mossad had two big advantages over other intelligence agencies. It was driven by a Zionist seal to advesced fighter supplied by the ministers what you want consolidate the new state. ervoir of fatent. "People were our main asset," said

G, a former agent The "people" were part of the great Zlouist "ingather-ing" of hundreds of thousands of Jewish immigrants from Iraq from Russia. Morecco, and from all the countries of Europe. With them, came dialects and languages, different cultures and knowledge of how to behave in the countries of their birth. No intelligence agency outside israel could

Contents and columnists

, hoest such a reservoir of talent. But was it any good at intelligence gathering? The US would soon find

out. In February 1956 when Nikita Khrushchev, the for-mer Soviet leader, delivered behind closed doors his devastating speech indicting Stalinism and the purges, Washington was desperate

to get a copy. But how? Israel obliged helped by Victor Griefsky, a young Israeli journalist in Warsaw, in bed it turned out, with a communist from whom he managed to obtain

a copy of the speech. He passed it on to Israeli diplomats in Warsaw who dutifully sent the material to their masters in Tel Aviv. The CLA paid \$1m on delivery. It was welcome cash for a country trying to buy weapons, And, for Mosead, it. won international respect

from its peers. With the plethora of linguists and people on the ground, Mossad pulled off another coup. In 1963, Kzer Weizman, now Israeli president, then commander of the Israeli Air Force, wanted to know what kind of military equipment the Soviet Union was supplying to its Arab comrades. Israel had to know in order to defend

"If you bring me a MiG-21, you will have done a good day'e work." said Weizman.

half in jest, half serious.

Massad took up the challenge. On August 16 1966, after three years of planning. an Imqi MiG-21, the most the Soviet Union to the Arab states, landeti at an airbase in northern Israel. To pull off such a coup required the efforts of an Egyptian-Armenian Mossad agent and a (Cathelic) Iraqi air force pilot. It was a complex operation which again impressed

Other successes fuelled the Mossad myth of daring invincibility. Among the most notable were the capture in May 1960 of Adolf Elchmann, the Nazi war criminal, the June 1976 raid on Entebbe airport, when

hostages held by the radical Popular Front for the Liberation of Palestine, and "Operation Moses", the airlifting of thousands of Ethiopian Jews to Israel between 1981

and 1984. But next to such succes were terrible lapses of judg

"Sometimes we did not evaluate information," said E. "We could gather it, recruit agents, monitor our enemies. carry was how good were we at

evaluating intelligence?" That was put to the test in 1973. Even though a military build-up was taking place in Egypt, Mossad and the other intelligence agencies were convinced an attack on Israel was "highly improba-

Maybe it was a sense of overblown confidence after the Six Day War, when Israel captured east Jerusalem and the West Bank. Maybe it was competition vices. In any case, on Octo ber 6. at 1.55pm, on You Kippur, when Israel - and all its reservists - observed one of Judaism's holiest holidays, the Egytian-Syrian attack began, it ended 11 days later. Israel and its intelligence agencies had

taken a buttering. The Agranat Comm set up to establish the reasons for the blunder, concluded there were insufficient checks and balances; not enough pluralism of opinion: reluctance among agency members to speak up; and the ignoring of dif-

fering opinions. Over a quarter of a resttury later, the Youn Kippur war is still used to warm Mossad recruits against "kontzeptziya" – an idée fize. The Mebdal, a Hebrew neologism for intelligence blunder used to describe the Yom Kippur war, is "the first thing we learn in intelligence", according to one

young officer. "If you want a reliáble intelligence service, you can't allow 'yes men' who

want to hear," said G, the former Mossad agent. "Agents must challenge their own assumptions. Mossad must tell the politicians about the trends indicating

the possibilities of peace."

And so, after the recent blunders, in steps Sphraim Halevy, a British born, 63veer-old former ambassador to the European Union. One of his first meetings after his appointment as Mossad's dan, still angry over the Meshal affair, Netanyahu's role in it, and the miserable state of the peace process in the Middle Rast. Back in the 1970s, the late

Minding Your Own Business

## Cut and dried out of Africa

David Spark discovers why sun-dried fruit has become a hot item in a cool Britain

found Adam Brett under a packing machine in his new warehouse trying to ensure that Tropical Wholefoods kept up its deliveries of dried fruit from Africa and Guyana to 800 healthfood shops round the cent is similar to the percentage UK. If you run a small business. you probably have to struggle with the machinery, too.

idea was that small farmers in achieving. Africa could produce high-quality

amount of raisins for 50p. Brett, now 33, took a deep processing. breath when he asked Ugandan farmers what they would conwhat this implied for the retail. price in Britain. Dried mango

But Brett persuaded independent retailers to buy dried fruit making the dryer as technically as a spack, not for cooking. The premium price he pays for dried enables Tropical Wholefoods to packaging, distribution and overheads in Britain. As a result, says—the carcasses of elephants." Brott, the furmers are tremendously loyal and diligent. "They

high enough standard, we agree to buy what we bought in the past, or more if we can."

Brett points out that 55 per Tate & Lyle pays to overseas estates for sugar. He reckous that to make a profit on that basis he Tropical Wholefoods is based needs a minimum annual turnon an idea and a gamble. The over of £400,000 - which he is

By profession. Brett, who was dried fruit. The gamble was that in the Footlights entertainment British customers would like it so club when at Cambridge univermuch that they would pay 12 for sity, is a stage manager. Howa packet of organically grown ever, he was born and brought up dried mango when, from a in Uganda and became involved nearby shelf in the same shop, with Ugandan fruit when his they could buy an equivalent father gave him a job on a British aid project concerned with fruit

In 1991 be joined consultants from Britain's Natural Resources sider a worthwhile price to be institute in a project to devise a paid to them and worked out fruit-drying system and train farmers to apply it.

Ugando had the sun and the tends to be more expensive to surplus fruit. So why had similar harvest and prepare for drying fruit drying projects not got very because it is picked from trees for before? Post efforts, says rather than vines, and then the Brett, tended to be run by scienpeel and stones get thrown away. tists rather than business people.

"The emphasis had been on perfect as possible. There was little concentration on marketing mango, banana and pineapple, or on training the local people. After the scientist ran a dryer pay life-changing sums to African beautifully for a few days, the farmers. The company pays to people hadn't learnt how to main-African and Guyanese suppliers tain it and anyway, their product 55 per cent of its takings, leaving would have no market. So, the rest to cover warehousing, around Africa, you find old disused drying projects, rather like

Brett decided it was a mutter of scule. He devised a dryer able to cope with 25kg of mango or

banana a week, rather than sev-

"Each farmer has a quota. As eral tonnes. Essentially, this is a well, he started pre-packing the long as they are producing to a box which a local carpenter can make and is easily loaded. "It keeps insects off and it's chicken-

and goat-proof," Brett explains. "I went round finding farmers who would like to start drying. It was a complete surprise to them. Why should anyone want this shrivelled-up fruit?"

initially, nobody did. British wholesalers had shown interest but they didn't want dried mango in 4kg bogs. They wanted it in small packs. So, in 1992, Brett teamed up with the friend of a

Why, asked the Ugandan farmers, should anyone want this shrivelled-up 🖁 fruit?

friend, Angello Ndyaguma, who had a small import-export business in Kampala and knew how to deal with officials and transport. They formed a company. Fruits of the Nile. Kate Sebag. who was working in Uganda for the agency Tools for Self Reliance, also became involved.

Between stage management jobs, Brett began testing the British market. He financed his journeys to Uganda by taking secondhand computers there and selling them. Back home, he stored dried truit under the stairs and sold it loose from stalls in two London street markets. When this went

fruit for sale.

In 1993, Brett and Sebag decided to go into business full-time, and her family has put in more than £70,000, which saw Tropical Wholefoods through the expensive growth stage. Brett says: "We're always having to buy next season's crop in advance. Because the business is growing so fast, the crop we buy is much larger than the one we're selling, and that gives us tremen-

dous financial problems." Wholefoods commonly has to wait two months for its money from sales. At the end of 1996, customers owed nearly 250,000.

in the year to March 31 1995, Tropical Wholefoods sold £61,000 and white television sets. They worth of fruit and lost £23,000. The following year it sold £140.000-worth and lost £15.000. In the year to March 1997 it sold £262,000 and lost £7,700; it also needed to invest in shelving, weighing machines and computers for its new warehouse rented from Lambeth council.

But since then it has hit a series of the targets it set itself earning around £35,000 a month from an increasing number of healthfood shops in Britain and mainland Europe, and from an onganisation in Japan, Apart from Brett and Sebag, it employs one full-time member of staff and three packers. Two thousand packs of fruit are produced every day, some in pre-printed bags, which involves a £2,000 initial outlay per product but saves work on labelling. Some of the fruit is increasingly used in manufactured foods. For instance, Fulwell Mill Bakery in Sunderland, which employs disabled people, makes dried banana into

a bar called Banana Fruitjack.

Tropical Wholefoods' sources of supply now extend well beyond Fruits of the Nile. It buys from farmers in Burkina Faso, through the Cercle des Secheurs (dryers' circle) founded by the Centre Ecologique Albert Schweitzer. The Commonwealth Science

Council arranged for Brett and Ndyaguma to hold a workshop in Guvana As a result, the company now buys dried mango and starfruit from Tropical Organics, a local

fairtrade company. Angello comments from Uganda: "Most farmers engaged in fruit drying have managed to send their children to school and have acquired radios and black never used to have these things.

Brett says the farmers range from some with only a single dryer to others with big farms. Keen dryers can earn 10-15 times the local average wage and some have given up civil service jobs to go into fruit drying.

Recently Sebag heard that women growing oyster mushrooms near Uganda's south-west border were having problems selling them; she offered to buy dried mushrooms, for which there is a market.

In January, Adam Brett and Kate Sebag won the World Vision award for development initiative in the annual business awards run by the charity Worldaware.

What of the future? "We hope we can expand our sales into continental Europe and into larger British shops over the next two or three years. We are starting to get in touch with some of them."

Tropical Wholefoods. Unit 9, Hamilton Road Industrial Estate, West Norwood, London SE27 9SF; tel 0181-670 1114, fax 0181-670 1117. The Nature of Things

# Plumbing the depths of space

Andrew Derrington boldly goes to the lab at the end of the universe

dreds of years ago thought of the unexplored depths of Africa. It is unimaginably remote and empty, and will only become relevant to us when it has been opened up by exploration and trade.

Only when spaceships make it possible for astronauts – closely followed by astro-traders and astro-tourists - to leap across the void that separates us from other planets and other solar systems will the depths of space have any meaning for the person in the street,

Space may be empty, and even its emptiness can have commer-cial potential, but the rest of this image is wrong. It is conditioned by television programmes of hitch-hikers touring the galaxies and the Starship Enterprise boldly going where no man has gone before, to encounter, and to goggle at, exotic extra-terrestrial beings in much the same way that hundreds of years ago white Europeans were amazed by the peoples of "darkest" Africa.

Space might conceivably be a trading zone of the remote future or an intergalactic hitch-hiker's route to the restaurant at the end of the universe. But it is aiready relevant to our lives

Over the last hundred years or so it has become clear to ecleutists that it is an exotic, high-powered physics laboratory that exceeds the earthbound scientist's wildest dreams. It contains countless millions of examples of experiments too dangerous to carry out on a small and fragile planet like ours explosions in this laboratory destroy stars bigger than our

Long before man's first tentative leap into space, it was clear cules to about a tenth of a millithat to look at the heavens with a telescope is to peep through he window of the physics lab of the gods. The most dangerous

We are only just beginning to learn how great these distances are

experiments are taking place at the other end of the lab. Astrophysicists do not yet know what these experiments are but they are incredibly violent.

About once a day one of them releases a brief violent burst of high energy gamma radiation which can produce up to 50 times as much energy as our sun itself a powerful nuclear fusion reactor - will in its entire lifetime.

Fortunately the violent bursts of radiation emitted by these events are spread out by the distance they have travelled so that only a minuscule fraction reaches the earth.

We are only just beginning to learn how great these distances are. Last week a team of scien-

ost of us think of tists led by Shrinivas Kulkarni outer space in the of California Institute of Tech-same way that nology announced that the Europeans hun- source of one of these gamma ray borsts was more than 12bn light years away.

Closer to bome, the manned space programme allows scientists to put a toe in the doorway of the celestial physics lab and to exploit the opportunities it pro-

One of the first things that they encounter - indeed it is the very reason that astronauts need to wear space suits - is the emptiness. In space there is no air to

> One of the first things encountered in space is the emptiness

breathe and no air to contami-nate industrial processes, such as growing high-quality crystals of materials such as gallium arsenide to produce new types of

electronic devices. In fact, it is not quite that simple. Although the air in the regions of space where the shuttle files is not dense enough to breathe, it is not a complete vacuum. At sea level the air molecules are packed closely together, separated by gaps of about a millionth of a millimetre. Where the shuttle flies the gap between molecules is about 10,000 times greater: the air density is about a trillion

This is a huge difference, but the best vacuum chambers on earth are better. They can raise the distance between air molemetre. Not until we get way out into the distant reaches of the solar system can we do much better. The gas that "fills" our local galaxy, the milky way, has gaps of between one and and 10 centimetres between the stoms.

It would take decades to fly out to these regions and return, but the space shuttle carries a trick up its sleeve. The Wake Shield is a 4-tonne steel disc, nearly four metres in diameter and shaped like a flying saucer.

The shield flies free of the shuttle at nearly 30,000km an hour, creating a gap behind it where the air molecules are about 1mm apart. This is better than can be produced on earth and good enough to grow highquality crystals.

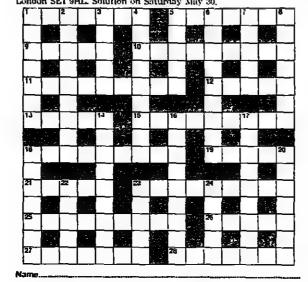

But the best vacuum detected so far was spotted last year by the Hubble Space Telescope. It is millions of light years away and the atoms there are about 10 metres apart. You won't find a better vacuum this side of the

end of the universe. And if you go to the end of the universe to look for one you should not believe the Hitchhiker's Guide to the Galaxy. There is no restaurant there, only a physics lab. The author is professor of psi-

chology at the University of Not-

### PERSPECTIVES

eligion is being privatised, And in a Truth of the Matter borderiess, polycultural world, the name for that non-material dimension of man desire has been changed

## The impetus that will not die

Even the atheist searches for sense in the spiritual, says Christian Tyler

psychotherapist is in many places supplanting the priest in trying to give people meaning to

Religious worship itself has been secularised, a trend followed with particular enthusiasm by the Auglicans who turn churches into community centres, coffee shops concert halls. Church leaders of all denominations have been forced to adopt the role of

political lobbyists. In other words, religion is increached a treated at a matter between a person and his conscience. No wonder writes), science now does most of traditionalists of every omination are in revolt, and that a conservative Pope

sistently warns his flock gainst the sin of relativism Yet for all that, the religious impetus refuses to go away. Religious feeling remains a fact of life, a force for good or evil whether it is the Middle East or the Balkans – which diplomats

and other peacemakers have

been compelled to recognise. Whether that impetus is somehow inscribed in the him genetic blueprint, such as Chomsky's linguistic granu or provides some kind of dutionary advantage, or is the divine spark implanted by God, it is an inextricable part of most intries' history and culture.

What is more, it appears to be on the rise again. For secularism has not run upwards in a

straight line from the histories of English Christiantly, Adrian Hastings, has identified peaks of enthusiasm in the 10th, 13th, 17th and 19th centurie

Church attendance in England has stabilised. Roman Catholicism flourishes in Africa, Protestant evangelists are busy in Brazil and were having a field day in post-Soviet Russis until the Orthodox Church complaint to the president. The rise of Islamic fundamentalism, in particular, since the 1970s, ne no elaboration.

Meanwhile res King's College, London, have identified more than 500 new religious movements, some with in the west, the Age of Aquarius and other esoteric systems have crowded Christian theology from the bookshops, and there are said to be more astrologers in France than clergy.

All this seems evidence of "a honger for spirituality," as one essayist puts it. Some of it may be vicarious, like the tabloid wayward clerics. Much of it may be due to a fear that public morality cannot long survive the Judaco-Christian precepts on which it is based. Whatever the reason, there is a mood even in intellectual circles, where religious faith was once

onsidered a form of simple "the opium of the masses take religion more seriously.

The writer John Mortimer describes himself as a member

the "Atheists for Christ" brigade. The threat of damnation never did much to reduce the crime rate, he says. Yet atheists too, need to believe in something more lofty and satisfying than colless materialism. The word "spirituality" is a

cop-out, of course. But it can be nseful. Secolarism allows - : atheists such as Mortimer to reassert that transcendent ment of human nature which is found in art, poetry and music. (You do not have to be a Latheran to play the music of Back, or a Roman Catholic to

sdaen.) It allows perform Me them to provide an account of humanity and a purpose for human life which science, be ethically sterile, cannot provide On the other side of the fence

secularism allows believers to question their ideas about God. Here, the writers ask: Can God nsidered a parental figure? Is he always benevolent? Is he omnipotent? Or is he (as the Wantchasan heretics used to say) engaged in a perpetual struggle with an equally potent force for evil, with humanity playing the part of the soldiers on the battlefield? Is he, after all, any more than the objectified mation of needy humanity?

Religion, like any other social phenomenon, mutates. It is this recognition which gives moderates of all denomination more in common with each other than they can possibly have with realots of their own stripe. * Two Cheers For Sécularism Sidney Brichto and Richard Harries; Pilkington Press, Yelvertoft Manor. and kept on repeating the word dencing round in a circle. "I A hundred years ago - my think he was your great-grandfa-great-grandfather's funeral took ther corrected the adult. "Oh no," was the emphatic reply. "He was ver-r-ry great!"

Even as children his descen dants did their best to be loyal to studied Victorian history for School Cert, and answering a question on Dispeli managed to

I guess the stories I know

about Gladstone are not about "greatness" in the political sense. In his final years, two inventions had changed the pace of life. Bicycles were everywhere. And a telephone had recently been installed in his house with two direct lines, one to his daughter, Mary Drew, who lived locally. It seems Gladstone did not take to the telephone in his late 80s, but Mrs Gladstone, often confused, would telephone Mary each morning to ask what she should give her husband for breakfast. and Mary would make a helpful suggestion. This would solve the

Memories were quoted by one of his grandchildren. Dossie Parish, who talked of being taken to the House of Commons as a very small girl, and peoping through the iron grille of the Ladies Gallery and watching "Grandpa doing his 'nastics," by which she meant he flung his arms around. Gladstone urged everyone in his family - he had eight children - to do their own packing.

Until the funeral on the Saturday morning the coffin lay in Westminster Hall for two days; by the time the door opened at six each morning, several hundred people were waiting. The family had decided that the funeral should be "conducted with every simplicity" with no flowers, and just morning dress, rather than full mourning attire. which is sensible advice even by the yew hedge: my brother, problems of how the egg should today. A young man arrived for Yard, among whom the four chil-Peter, aged about four, me even be prepared and ensure that the an invitation and apologised for dren, the grandsons, stood out. Armisteed, the Earl of Rosebery,

As half past ten struck, the funily carriage carrying the coffin drawn by two bays and led by two coachmen came into view. All the men in the crowd removed their hats, then a most unusual sight, as they watched the very slow procession pass by.

The pall-bearers mut the coffin and carried it into the Abbey. They were, on the right side, Lord Rendal, the Duke of Rutland, Arthur Balfour, the Mar-Those walking in the process quest of Salisbury, and the sion had assembled in Palace Prince of Wales (later Edward VII); and on the left side, Lord

Kimberly, and the Duke of York (later George V). So it was that Gladstone had two future kings as his pall-bearers.

As long as Queen Victoria had been on the throne, Gladstone had been in the House of Commons and she had come to dislike some of his policies, which struck her as being too progressive. But it seems that she recalled the iong talks she had with Mr and Mrs Gladstone after Prince Albert had died. Here is the telegram Queen concerned my personal welfare Victoria sent Mrs Gladstone from

"My thoughts are much with you today when your dear husband is laid to rest. Today's ceremony will be most trying and painful for you, but it will be at the same time, gratifying to you to see the respect and regret evinced by the nation for the memory of one whose character and intellectual abilities marked him as one of the most distin-

Cossacks, they can call themselves whatever they like for all I are a strong people, physically

and spiritually od spiritually..." Galkhin, like most Russian civilians in Chechnya, also had nothing but contempt - wholly justified by the event - for the Russian army for its unwilling-Chechens: "The soldiers just sit behind their concrete

anything that moves."

The failure of the Russian army and the Cossack movement in Chechnya illustrates the most sia today: the desperate weakness both of the Russian state and of Russian society. Together, they make for a country which is radically different from any Russia that has existed in the past.

Russia more closely resembles a weak, oligarchical, heavilycriminalised Latin American sta of the tsars, with which so obsessively compare it.

the Russian state means that it taxes to pay or supply its army properly, or to prevent corrupt bureaucrats and officers from stealing what resources are available. The result has been hungry, badly equipped, demoralised, literally suicidal soldiers and jumor which they are asked to risk

As "Valery", an interior forces conscript told me in Chechnya: The Chechens are fighting well because they're fighting to defend their homes ... and we're ers tell us to fight. And who are our commanders? Thieves who steal from us and then

The weakness of Russian socisty comes from 70 years of Communist rule, during which especially of course under Lenin and Stalin - every autonomous, spontaneously generated social, cultural and political institution was remorselessly smarhed, and

The lack of real democratic control has allowed the plunder-ing of Russia's resources by the new elites in what was dubbed "privatisation". This process had strong analogies to "land reform" country of the recent past than it in liberal states such as Mexico does the Soviet Union or the Rus- and Italy in the 19th century enormous tracts of land were many western commentators : transferred to officials business men and politicians with links to the liberal regimes. The mass of the population either did not benhas been unable to raise the efft or actively suffered as a

However, the lack of true democracy and civil society in Russia, the anathy and cynicism of the mass of the population have also had one good effect: they have prevented mass mobili-sation behind political causes and after all, given the economic suffering and moral chaos in Russia today, there is no guarantee whatsoever that these causes would not have been chanyinist

The fallure of the Cossacks to mobilise large numbers of Rus-slans - even in the most ethnically mixed and sensitive areas like the North Caucasus - behind send us to die to cover up paramilitary nationalism is a ism. Most Russians make no their real beliefs and aspira-

case in point. This has been a key secret of their acute dislike for part of the failure of Russia so far: to take the Serbian path; that is, mobilising large numbers of people, in Russia itself, but much more important, in the Russian minorities outside Russia, to fight for a new, ethnically based dan empire:

To its credit, the government of Boris Yeltsin has never adopted such a strategy - but as the fail-

Lack of real democratic control has allowed the plundering of Russia's resources by the new elites

ure of the Cossacks demonstrates, even if Moscow were to try to mobilise Russians behind such a policy, the apathy of the population would make it

As Chechnya demonstrated, when the Russian army failed, Rossian nationalism - let alone of Russian volunteers - to insist that the government fight on to protect Russians in Chechnya club, and they have never talked and suppress Chechen separat- to young Russians about €, ...

Chechens, but as opinion polls repeatedly demonstrated, the war against them never enjoyed wide popularity and, by 1996, a large majority of Russians wanted only to end the fighting.

As for the vast majority of unwillingness to go to fight for Russia in Chechnya or anywhere else, indeed their overwhelming indifference to Russian "national causes", should be blindingly apparent. The commander of an elite Russian military unit told met "Who'd be a soldier if you could get a job in a bank? Modernisation and urbanisa-

tion mean that Russians have over the years been exposed to many of the same demilitarising influences as their equivalents in the west albeit of a peculiar kind. This process was greatly assisted by the futile and bloody war in Afghanistan. Most of Russian society today is profoundly individualist and materialist and exactly the reverse of nationalist, let alone

But here lies the problem for western analysis. Too many senior western analysis of Russia, most of whom were "experts" in Soviet studies, do not know contemporary Russian youth at being paid. all. They have never spent time in a Russian discotheque or night

It is, perhaps, hardly fair to expect these elderly professors and retired generals to have to jig around to Russian pop music. It is fair to ask some of the professional Russophobes, given their absence from the contempoyoung Russians, their abhorrence rary Russian scene, whether they of military service, their utter should be a little less categorical about asserting that a basically unchanging Russian nation has a permanent commitment to imperialism and conquest.

This stereotype of Russia is a virtual litany for many US commentators in particular. These views are a striking example of how, like the Cossacks, when a certain national stereotype has lasted long enough and taken sufficiently deep root, it can be almost impervious to evidence or rational argument.

As for the new Russian elites, it should be obvious that they have been obsessed with filling their own pockets at the expense of the Russian state, not with restoring it as a "great

There has certainly been no evidence of concern for the Russian armed forces in any of their actions. Under their rule. Russia has become a state for which no sane soldier would wish to die certainly not to die without even

### BOOKS

t was André Malraux who coined the notion of a "museum without walls". He did so in 1947, just as the devel-opment of offset colour reproduction techniques was making the fully-illustrated art book a popular purchase. Malraux's own publisher, Albert Skira of Switzerland, pioneered the generous use of colour in art books, and other firms were following fast: notably Phaidon and Thames and Hudson in Britain, and Harry Abrams in New York. Large print runs enabled these books to be priced at a level previously unthinkable. As Allen Lane's Penguins had brought literature within the sixpenny spending power of schoolchildren, so the likes of Phaidon released art history from the connoisseur's domain. For 12 shillings and sixpence anyone could possess a folio gallery of Cézanne, Botticelli, or Van Gogh. A museum in cloth binding is one way of putting it; or else it amounts to the domestication of high

Hoarding the extraordinary - the beautiful, the curious, the rare - is the connoisseur's vocation, a human craving which has been democratically satisfied by mechanical processes of sproduction. But what was it like once upon a time this urge to "domesticate" relics and objets d'art?

In late Renaissance and Baroque Italy curiosity was a social attribute. Aristocrats and senior clergy by definition collected the unusual fruits of nature and artistic dexterity. The peasant who ploughed up a fossil knew just where to take it, like a sort of cultural tithe. No baronial bome was without some semblance of cabinet and pinacoteca. The diligent ducal curator compiled his own catalogue, complete with claims to possess a dragon's skull or unicorn's born. The aspiration of every "noble and free intellect" was to gain admittance to the Accademia dei Lincei, or "Academy of the Lynx-eyed", founded at Rome in 1608. Academician Galileo may have been put under house arrest for revealing too much with his telescope: still, patrician vir-

lectual discovery. It is in this context that dal Poszo - elected one of the Lynx-eyed in 1623 - created his Museo Cariaceo or "Paper Museum".

siano was not a vastly wealthy man, though he would commission over 40 paintings by Poussin. He rose to comfortable position on the shoulders of the Barberini family, whose Cardi-nal Maffeo became Pope Urban VIII in 1623. Ensconced in a small palazzo in Rome's Via dei Chiavari, Cassiano had no hope of assembling a massive collection of antiquities and natural history as such. But he did have the means - and imagination - to hoard vicariously. That is, he set up his own system of putting the world on paper. Whatever ranked as a contribution to the encyclopedia of knowledge and culture, Cassiano desired it represented and classified. It might be a newly-disinterred Roman sarcophagus; it might be

## On love and diversity

Richard Skinner reviews anthologies of poetry and prose

kind of expertise to put together, they are notoriously hard to sell and they have very short life spans. Despite this, however, they are often extremely interestng and, in this age of compi-

Anthologies come in two kinds. There is the "here and now" kind, whose chief nterest is the newness of the work, a sneak preview of coming attractions, and the there and then" kind. which comes after the fact, chooses with hindsight and then preserves for posterity.

New Writing 7 is an examole of the former. In their introduction, Carmen Callil and Craig Raine tell us that their three guidelines were "diversity, diversity and diversity", which is exactly what we get. Short stories. extracts from novels, screenplays, poems, essays and an interview all jockey for position in this lively collec-

Julian Barnes and Jonathan Coe have short stories set in different times and places, 19th-century Russia and contemporary France respectively, but play with similar themes of thwarted lova. Louis de Bernieres continues his magical adventures in Marquez-land with a story that is luscious as a

More demanding is an alliptic and enigmatic story about loss and grief from Lucy Eliman, an impressively written tale of suburban exotica from Kirsty Seymour Ure and a wonderfully black piece from Michael Dibdin, whose recipe for "Lover Pie" urges readers to kill and cook ex-lovers and then eat them with a fine claret served "piping hot

with a meraschine cherry". Poets get a good spread tions from Oliver Reynolds and Lachlan Mackinnon, as well as other work from the upcoming Ben Rice and the returning Wendy Cope. The only interview in the collection is with the poet Ian Hamilton, whose unfashionable but salient points about the state of contemporary attitudes towards poetry

seem prophetic. Richard Glyn Jones' anthology, Love Is Strange, is an example of the latter kind - none of the short stories here are new, all of

nthologies are curi- stories trawl through pasous things. They sion's slipstreams and backrequire a certain waters, where more unorthodox fantasies are allowed to unfold away from main-

anthology's high-water mark is provided by Charles Bukowski and Georges Bataille. Bukowski's story, about two men who steal a corpse and commit necrophilia, is typically laconic and amoral, while Bataille's story is a bizarre, yet hypnotic tale of debauch ery in a bar.

Milan Kundera, whose work has always had streaks of dark fantasy running through it, gives us a lucid and precise tale of sexual

### ew regions of Europe are more desolate, dangerous and understand than the southern Balkans, Here is where we see the baleful effects of modern European myth-making, at their worst. Here is where poverty, official corruption, intolerance have scaled new heights every year since the fall of Communism in 1989. Only three years after the end of the Bosnian war, here is where Europe's next armed conflict is already

aral fieres

breaking out. The centre of this drama is the southern Serbian province of Kosovo, where ethnic Albaniens outnumber Serbs by a factor of roughly nine to one. Serbian state repression of the Rosovar Albantans' aspirations to self-government has provoked a derce backlash in the last two years.

Moderate Kosovars, who preached peaceful resistance to the Serbian authorities, have lost control of the situation. The pace of events is dictated by the increasingly well-armed, well-financed Kosovo Liberation Army, which stands for Kosovo's complete secession from Serbia. The Serb-dominated Yugoslav armed forces have spared little in their response. At least 150 people have been killed in Kosovo since

## More bloodletting in the Balkans

Tony Barber explains how national myth-making and propaganda has fuelled hatred in Kosovo

Beyond taking steps to ensure that the impending war does not engulf neighbouring Albania and Macedonia, let alone Greece and Turkey, western governments seem at a loss over what to do. In December 1992, just days before he retired from the US presidency, George Bush warned the Serbian leader. Slobodan Miloševič, that a crackdown in Kosovo would draw a US military response. The crackdown is happening, but the response

Noel Malcolm and Miranda Vickers have provided an . excellent service to readers who wish to gain an insight into why bombs and bloodletting are once more scarring Kosovo's landscape. There are all too few books on Kosovo in the English language, and these fill the

gap handsomely. Vickers, in particular. makes a diligent effort to understand the Kosovo question from both the Serb and Albanian viewpoints. Each nationality thinks of the province as its ancestral heartland and cannot bear the idea of

relinquishing it to the Yet as Vickers points out, it is the ordinary Serbs and Albanians of Kosovo who have suffered most from the monstrous myths constructed around their

history by nationalist

KOSOVO: A SHORT HISTORY by Noel Malcolm Macmillan £20, 492 pages

BETWEEN SERB AND ALBANIAN: A -HISTORY OF KOSOVO by Miranda Vickers Hurst & Co £35, 328 pages

propagandists since the mid-19th century. Serbs in the comparatively swish capital of Belgrade tend to despise their brethren in dirt poor Kosovo, calling them "half-black" and "Moslems" - in the Serbian context, terms ofvile abuse. As for the Kocovar Albanians fileir tragedy becomes all too evident when one sees the

corpses of people murdered by the Kosovo Liberation Army on the grounds that they collaborated with the Serb authorithes.

Malcolm's book is more controversial. He insists that his purpose is not to propose any particular solution to the Kosovo crisis. Yet long sections of his book represent an attempt at shattering the Serbs' most fundamental assumptions about their national identity. In the process, he is implicitly building up a case for Kosovo's independence

from Serbia Take Malcolm's account of the Ottoman victory over the Serbs at the battle of Kosovo Polje in 1389, and all timt ensued in the next four centuries. The long-term consequence of the defeat was the destruction of the medieval Serbian state and the subjection of the Serbs to Ottoman overlordship until

For Serbs, the story of the battle is absolutely central to their self-image. Epic sons cycles record that the nation sacrificed itself for Christendom at Kosovo Polje and was crucified. Three

thousands of Serbs fled Ottoman forces in Kosovo in what became known as the is said to have died and been buried. In 1912, when Serbla finally realised its great 19th-century dream nation experienced

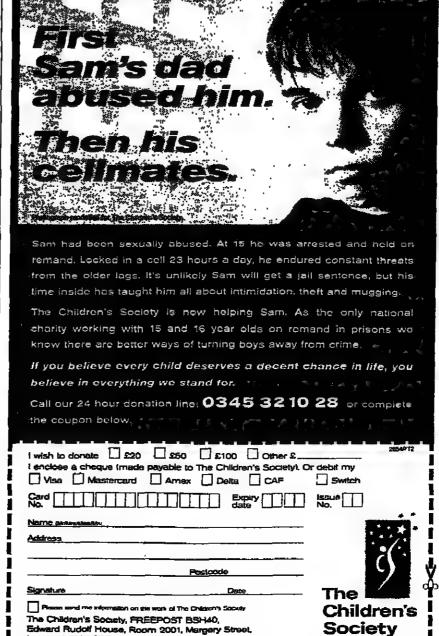

electronic scanning. But the

truth is that any pictorial

That this version of events is pure myth is hardly in dispute. Yet Malcolm wants to prove more than that. He wants to prove that, at Kosovo Polje, the killer of the Ottoman sultan Murat was not a Serb but a Hungarian knight. He wants to prove that the story of the Great Migration is mostly a pack of lies. In neither example does the source material conclusively support his argument.

In trying so hard to demolish the Serbian national myth, Malcolm comes close to falling into the trap against which he warns readers at the start, when he says, quite correctly, that quarrels about the distant past are no use for settling Kosovo's contemporary In 1853, the Archbishop of

Skopje wrote in despair of Kosovo that "these districts may be regarded as being in a state of permanent revolution and anarchy". Today the province is teetering on disaster. Malcolm and Vickers have done a fine job in explaining why war may now be

in Britain tend as an English-speaking region with beaches, cricket and a few Rastafarians, explains the novelist, playwright and now editor Caryl Phillips. "But in reality it stretches from South America up to New Orleans, some would even say Miami, and as far west as Panama. Cost Rica and Guatemala".

While this may be an unremarkable statement of geographical fact, in cultural terms Phillips' comprehensive approach requires a radical redefinition of the region's cartography. "When I travelled round the whole Caribbean about 10 years ago I realised that - and this was after I'd written a couple of novels about it - my own notion of the Caribbean was pretty restricted and not a fair reflection of its complexity. I was actually struck by how similar it all was, particularly on the coasts. It was obvious that if you stripped the language away there was an incredible commonality to the culture, ethnically and economically, as well as similar landscape and flora and fauna".

As the 50th anniversary of

the arrival in the UK of the first generation of West Indian immigrants on The Empire Windrush ship approaches. Phillips has been reflecting on his own, and his region's, history. Born in St Kitts in 1958, he moved to Yorkshire with his parents when only a few months old. He was the first pupil from his school to go to Oxford and from there he went on to write plays and then novels, including the Booker short-listed Crossing The River and, most recently, The Nature of Blood, in which he ambitiously took on both the holocaust and a re-write of Othello. Phillips now teaches contemporary fiction for part of the year at Columbia "reading the theses is like spying on my friends" spending the rest of his time in London when not lecturing or sitting on cultural committees. The opportunity to more accurately reflect the complexity of Caribbean writing has come along as part of the deal that brought him back to Faber for the publication of The Nature of Blood. He had long wanted to take on an editorial role and, with Faber's tradition of publishing Caribbean writers, it seemed natural for him to launch their

Heights by Maryse Conde, a re-working of Wuthering Heights from the Guadeloupe writer and perhaps the leading female author in the Caribbean; Cuban Antonio Benitez-Rojo's collection of stories, A View from the Manarope: and Wilson Harris's 1960 novel, Palace of the Peacock, which comes with a new introduction from the "The history of the region

means to him: Windward

as a literary zone has been short". Phillips concedes. "Until the 20th century people could only read literature from and about the local colonial power, and so It cover was that mirror into which you looked to see your history. But common themes have since emerged across the languages. Things that have been written in have all served to thicken the stew. And so while you can't think along the vertical continuous line as can be done in Europe, with Cervantes to Shakespeare to

Goethe etc, you can at least

think along the horizontal

plane. There are and have been some extraordinary individual writers, of course, but looking at it island by island or language by lan-guage, the literature is not particularly weighty. It is when you look at the literature as a whole that it does begin to acquire a certain

vibrant Carlbbean literary traundoubtedly emerged, Phillips acknowledges that it is not currently being prac-tised in the Caribbean. Most of the authors on his list like himself - live oversess, French, Spanish, Dutch, son that writers move to being a writer was no cakewhere there is a publishing industry that can support them and will value their work". Faber has made an effort to promote a wider based literary culture in publishing the Carlbbean

region, but in fact the sense of physical movement away, and the subsequent confusion as to where or what is "home", forms a restless and fascinating core to the writing itself. This week also sees the paperback publication of Phillips' anthology of writing on Britain by writers born overseas, Extravagant Strangers, which includes

contributions from Orwell, Ballard, Lessing and Boyd. While Phillips has himself claimed to have no place that he calls home, the subject continues to exercise him.
"I feel a desp affiliation to that is the Britain because that is the for a Leeds against Liverpool country that made me. But game, and people around me it's a double-edged sword in

walk. I was the only black boy in my class in a place where they didn't even like people from Lancashire, so you can imagine what they thought of me. So while I feel an affiliation to Britain, series at half price in the I have never felt comfortable

with thinking of it as home in that carpet-slippers-and-

Intriguingly, the place where he feels the most notent sense of homecoming when returning is "the last 200 yards walk to Elland Road", the stadium of Leeds United Football Club. For anyone who recalls the spiteful atmosphere that infected the home of Leeds United in the 1960s and 70s, it is more than surprising that a black boy would feel comfortable there. "They've really cleaned up their act now", says Phillips. "But there was one time when I was there game, and people around me started singing 'Td rather be thought then I may have to stop going there for a while, but questions of loyalty and fealty are odd. I first went to

five and that for me was

England. It still has an ata-

vistic pull for ma".

relations then and now. "Things have obviously got much better", he says. But he was disgusted at the respectful tributes to the MP Enoch Powell, who died in February. Referring to Powell's notorious 1968 anti-immigration speech, Phillips says "what he said was absoiutely disgraceful. It is to Britain's credit that he was proved wrong on every count. He misjudged the nation totally. And this attempt to rehabilitate him seems to forget that between

this week to deliver a lecture

at the university on race

1968 and 1976 there were many racial murders which could be attributed to his rhetoric. It had a patrician gutter and he made it okay for skinbeads as well as middle-class people to be recist. Obviously he didn't want people to be killed, but he he was appealing to the lowest common denominator. Mercifully Britain is now not inely optimistic". Phillips returned to Leeds

the same place, and Powell was the last roll of the dice for that idea that you can only be a Briton if you are white. People who now cling to that notion must have a hell of a time seeing Paul Ince or Unford Christie leading their country".

And it is not only in the traditional area of sport that Phillips sees improvement. "One of the things that excites me about British literature is that it is truly multi-racial and multi-cultural. With the likes of Salman. Hanif and Ishiguro I see literature as more reflective of the Britain I see on the tube than is, say, the House of Commons or the average bank or university. I take pleasure when I'm on a British Council tour and it's people like us who are the erature. It's still quietly subversive, but it also shows -that Britain has moved so powerfully and abruptly towards something that makes much more sense that, for perhaps the first time in my life, I'm genu-

ou might not think at first that there was much to learn from Paul Richardon's light and rather boppy travel book on Spain, Our Lady of the Sewers. For this is no historical analysis reflecting on Spain's highly visible past, the centuries of empire and decline, the Golden Age of art, the long dictatorship of General Franco and the latter-day emergence of a New Democracy and a New Spain. Nor is it a work of rural nostalgia, especially Andalusian, another well-established contemporary genre.

It belongs to a fresher type of book, which dwells on the idiosyncrasy and apparent contradictions of Spain, urban as well as rustic, hoping to find the quiddity of a peculiar nation. One such book is Gijs van Hensbergen's enthralling description of working in a restaurant in Segovia, A Taste of Spain. Another is Michael Jacobs' bleakly diverting Between Hopes and Memories; and a third was by Paul Richardson bimself, five years ago, in his book centre piece of writing.

Here is Richardson again. but this time a more ambitious Richardson, romping all over Spain. As before, the style is deflationary, young in tone. Men are often "guys", people "flake ont" or "wimp out". Occasionally he uses really horrible clichés which can be irritating; but generally the down-best directness is a pleasurs. "The peasantier the people, the louder they talk", he says, unsentimentally, and at another point,

**OUR LADY OF THE** SEWERS by Paul Richardson

born stains". So, off he goes in search of ancient customs, survivors, a sworn enemy of the nomnous, open-minded about the modern. And more often prisingly deep penetration cia, he visits a natural healer with the fake complaint that he is so jealous of his girifriend he may be about to do himself or others a damage. So kindly is he treated, with such old-fashioned, Christian compassion, that he sneaks eway embarrassed. It is an excellent episode.

In Granada, he infiltrates the intriguing world of Spain's own modern Moslem and failed. He visits the Canaries and enjoys the wrestling, survival of pre-Hispanic times. In Murcia. watches the speedy conversion of slaughtered pig into all kinds of foodstuffs. He joins a transhumancia. where sheep are being shifted hundreds of miles on foot, and writes amusingly of the foul mouthed shee

herds. It's all good fun and surprisingly revealing. But the core of the book, in the end. is the Spanish fiesta. In one of the best chapters, he manages to extract a great deal about the Basques, and the communality of their lives, during a rather gross seaport festival in which participants in a rowing boat grab a goose (a dead one only since 1975), and are then

swung aloft on a rope while still holding on to the goose. The climax of the book is two-day village outing in a landscape bursting with wildflowers, complete with the eponymous image of the "Virgin of the Sewers" dancing, a great deal of drinking. a bit of hash and a minimum of sleep. It is here at the fiesta, as others have tion that proves the rule before him, that he seems to about the impossibility of find the essence of it all, in escaping the twin scourges "the Spenish lust for life, the fierce Spanish love of pleasure and feeling." Perhaps we could do with a little of this up north.

## Politics brought to life

Macmillan and R.A. Butler. me certain that it was worth Fairlie caught them in their ripest and most reflective moods and infiltrated the accumulated riches of his notebooks into the text of a book he described as "the first instalment of a debt" to his country that "will never be repaid". To him we owe "Rab's"

remembered it as the fond, line about "the patience of politics" which for Fairlie expressed "more vividly than any other single considerations to forsake phrase, the character of tradition-matured political politics in a free country. He also stimulated "Uncle altogether cruder compost of Harold's" even better-known American politics. Finally, I recalled his gift adage that, "if people want a sense of purpose, they especially intriguing and archbishops and not from their politicians." multi-dimensional political So much for memory.

What I found on re-reading his 250 or so pages (completed in 1967 and published in 1968 at a moment of deep national distillusion with Harold Wilson and his administration and of growing cynicism about British political institutions and practices), was an intriguing paradox from a refined thinker occupying the decent and tolerant centre right of British

political thought. For Fairlie positively celebrated the contribution of the working class Labour movement (the real thing; not its accretion of middle-class intellectuals) to political life. As he put it, in less than a century they had shown themselves to be "a

ntil she was five.

governing class". Yet Fairlie felt stifled by what he called "the politics of agreement" that had overlain the British polity throughout his 20 years as a journalist. On this be took his cue from Churchill who had informed the US Congress in 1947 (at the height of the rows about nationalisation) that "four-fifths of each party in Britain agrees about four-fifths of the things that

his cake of phrase, not Fairlie's) he saw as the inevitable confection produced by a political condition in which the elector was to a government

ow many lives match between the Dadaist only significant talking for his onscreen talent. is a movie star inconsequence of its dia- point. The word "comeback" logue and the cool grandeur lies in ambush in every of its delivery.

John Travolta was back. doing more with less (once again) than almost any other actor around. Since Pulp Fiction he has tackled every role a demon casting agent could dream up, from heroin-addicted gangster to angel, and he still hasn't had a serious stumble.

Fitzgerald's saying. though, hasn't been disproved at all. What makes Travolta's return special is that it isn't a second act, it's

> I came to wonder if I was looking not so much at Huck Finn as at cinema's Peter Pan

a third. He missed the middle one completely: he left the theatre or the theatre left him. For 10 years he was out for the count in Hollydering why his fee had fallen There are no second acts in from \$4m per film to \$150,000 and why he was making films about dogs, orphans and talking babies. That gap in the career,

however, is as fascinating as the career itself. Fame's stories are often seamless, characterless trajectories: they have no second act because they are one interminable first act. The spotlit hero never excites any seditious speculation over what might happen if the lights were switched off and the sudience left him in mid-speech. In my book I try not just to gap was in some ways essential. If he wasn't earning he making good films, he was that might come.

ing. It starts to seem the

But the star of Grease, Urban Couboy, Blow Out, Face Off and Primary Colors is a man of many comebacks. Almost no other leading actor brings such fresh quirkiness to his films. Retuning the Travolta essentials - from the soothing but jaunty street slur to the walk that can be jived up for Grease or grunged down for Pulp Piction - his characters combine the high definition of caricature with a textured

Compared with my last ographical subject Arnold trian bulk who monided his movie career with the skilled monomania of an ex-muscle sculptor, Travolta seemed a ant actor and human being with unaccountable mystical icry, writing, healing. He attractive (and accessible) to the outsider as Symbionese

An early question for this book was: Can a same or intelligent person believe in this creed? John Travolta left school at 16 and may have left it mentally and spiritually even before that. His own perspective on culture and learning is summed up by his Huck Finnish statement in 1983: "Both those things are easily handled - just pick up some books and read a dictio-

# On the festival bandwagon

Andrew Clark reports on changing patterns in cultural consumerism

fanfare, a new festival theatre was inaugurated in the German spa town of Baden aden. It cost DM150m (£40m) to build, and the German taxpayer is committed to subsidising it to the time of DMSm for the next 22 years. The programme consists entirely of high-profile imports such as the Royal Opera; which will unveil its new production of Verdi's I masnadieri there on

At a time of cultural cutbacks elsewhere in Germany, a 2,650seat festival theatre represents a bold new initiative, extending a cultural tradition which has linked Berlioz, Brahms and Boulez to Baden-Baden over the past 150 years. On closer inspection, doubts start to surface. The Land of Baden-Württemberg is pour-ing money into festival events, while full-time orchestras, theatres and conservatoires struggle to cope with falling subsidy.

Has the festival idea gone playground of the rich and us. Now it is a backwater, trying to persuade Germans with snare time and money to pairon-

ise its overpriced hotels. It needs something to revive its fortunes. A festival is a convenient commercial tool. Art is being used to enhance image and profitability.

Baden-Baden is not alone. Imdreds of towns and summer resorts throughout the western world have given birth to festivals over the past two decades, most of them concrived as a marketing concept rather than an artistic entity. This is worlds away from the original festival ideal, which emphasised the eness of the events taking place. A festival was a place for artists to get away from routine and let their hair down with colleagues of like mind.

Most European festivals no longer subscribe to this idea; some are just a stop on the tour circuit. If you sean this summer's programmes, you'll find countless festivals promoting the same type of event with the same

word "festival" loses its mean-

This is particularly true of cities with a multifarious cultural life of their own. Take the City of London festival, the Munich opera festival or the Zurich festival. In each case, the programme is barely distinguishable from what is available the rest of the year. The events just happen to be more expensive; they have more "prestige". This is not a strong formula for a festival. In such cases, the festi-

ral becomes a conven Much the same applies to Baden-Baden. Its movers and shakers think they can create a festival overnight by bringing the Kirov Opera and the Vienna Philharmonic Orchestra to perform there. How mistaken can you get? In a few years the Ger-

artists. When you reach a certain to DM630 (£210) for a ticket will They want a sense of event. degree of interchangeability, the realise that "festival" in this This suggests a contradiction. case means "rip-off". The speed with which Raden-Baden raised its money and built its theatr was impressive; the one thing it forgot was the central nerve-system of a festival - the artistic

ut there's no use com-

plaining that Baden-Baden is one festival too many. Like it or not, the future of live festival concept. Festivals offer what the traditional season-long subscription series cannot provide: short, compact events. A festival is a collection of highlights, and in the 1990s, that's what the world wants. It's a symptom of today's cultural consumerism. People have neither time nor patience for run-of-the-mill evenings.

This suggests a contradiction. Logically, late-20th century society should have a greater appetite for music, because the post-industrial world has increased leisure time. Reality shows something different. The people who don't work don't go to concerts. They are the people with

Working people, by contrast, have less time than they ever had. They only have time for the best. Offer them a sense of uniqueness and they might come. And they're much more likely to come if such events take place at the weekend. They have no time during the week. In future we will see a prolifer-

ation of weekend festivals, with a variety of events packed between Friday night and Sunare to convince people of the value of the collective listening day evening. Aspen and Beaune experience, with all its attendant

the Baster and Whit festivals in Salzburg. Lucerne will inaugurate a weekend plano festival in November, embracing six highprofile concerts over four days. Daniel Barenboim has ed a new Whit weekend festival in Berlin next year.

There is a demand for such events, as long as the content is varied: look at the success of the time, but they have neither the money nor the inclination. Roger Norrington's "Experien ends, a festival in all but And if you provide a complete package, such as transport, eccommodation and post-conc mingling with the artists, you'll' have an edge over competitors. Corporate entertainers are already masters of this art. It's

one of the advantages festivals have over one-off performances. If concert and opera promoter The FT Summer Aris guide will

able location to match remarkable perform moto in Japan, Kuhmo in Fin. land, Verbier in Switzerland Their surroundings are spe lar, and that's why great artists enjoy playing there. ## Radio/Martin Hoyle Welcome return

to real people

his week's radio news began with the portennt that Robin Cook had "cleared his diary" to deal with the arms for Sierra Leone affair. Given his famously public contampt for "paperwork" one can only conjec-ture over the sparse entries that make up the diary of this very model of a modern foreign secretary: "Get divorced", "Annoy India", "Get married". In the event, Cook cancelled a meeting with the Board of Deputies of British Jews in favour of an appearance on BBCI's Breakfast with Frost: Shr David's soft-touch interviews are considered a right

The same news builtin on Sunday reported a preview of the government's plans on trusher: a preview given by Tony Blair not to parliament, but to the News of the World. While our media-besotted politicians have taken up residence in the PR-regulated world of soap-stars and rock idols, there seems oddly enough a return to real people in the field of radio drams. We have recently heard Shakespeare, Lord Reith, Elizabeth I, Chakhov and Handal.

But the greatest - in radio terms was Angela Pelbam the age of 12, when the second world war broke out. Her parents were in India and much of her life had been spent with gunts in England. She therefore had the cheerful middle-class resitience of putting a brave face on things. Wednesday's afternoon play, The Young Ambassadors, dramatised the family correspondence. Angels and her mother were played beautifully by Diana Quick and her real-life daughter, cis Bacon prowled and lurked, Mary Nighy; and a fascinating resenting Shakespeare for no picture emerged of Anglo-Ameri-

The Americans kindness and enthusiasm (especially for the British royals) are charted; so is American host's conviction that Britain would be "down and out" by the end of the war so there was no call to waste a good education on the young English. The Windsors call, the Duchess upset at her dress being ruffled by the children's bonquet. The children hear the radio linkup between England. Their horror at the torkilling 73 evacuee children, was underlined in Cherry Cookson's production with snippets from the sound archives. The voices of Chamberlain and Roosevelt and

and Mary Wimbuch.

There are amassed commi the strangeness of America: the "fairyland" of Virginia, the way schoolchildren compare parents as divorce juggles the distribution of fathers and mothers. "I can't help feeling it would be essier if we spoke different languages and admitted we were different," says Angela. And the adolescent girl flirts with a nice American medical student, refuses his invitation to neck, is called a cold Britisher in the kindest way (he rather likes her that way, but hopes she will grow 120 800E).

Throughout, the tone of the letters is sweet, fresh and loving; a Dodie Smith play with backbone, perhaps; a reminder of the terrible paradox that hopes were highest and life more vivid, emotions more keenly felt, when things were at their darkest and death an immanent presence. The play was a delight.

avid Pownali's An Epihanous Use of the more than it delivered. It intercut the preparations to broadcast the first ever play on 1923, the BBC of course, with the play's first night in 1602. The challenges and problems of the venture - actors adapting to an invisible audience - were slightly skated over. The parallel plot had a mummerset-accented Shakespeare terrified lest Queen Elizabeth, nearing 70 and mourning for Essex, should take offence at the play's portrayal of a woman besotted by a younger man. Franvery clear reason; and Elizabeth can relations before Pearl Har- eventually sneaked Will off to hear some recusant Catholic liturgy beautifully sung, her own illicit vice. Parallels were implied but not really drawn between politico-fashionable pressures then and now and the struggie with a new artistic medium - the Elizabethan premiere takes place

think. All it needs is a cast are

period flavour. Manon is more

ni's treatment of the same sub-

whole could have matched this consistency...McVicar and his designer, Tanya McCallin, view the action as a play within a play, framing it with shadowy period characters who have the same ringside view, and a similar sort of moral detachment, as the audience. The advantage of this approach is that it lends an allconsuming sense of speciacle to the opening sequence, which usually struggles to gather momenmoody versatility by Paule Constable, creates a sweeping conti-

atching televi-

sion's treat-

treating Monon as a morality play, he cannot identify with his subject as Prévost and Massenet did, And there's no point drawing attention to the frame if the characters portrayed therein are parallel with The Rake's Progress falls flat. If ENO had a Malfitano or a Domingo on its books, or a Manon with Lesley Garrett's per-

and minds. As it is, we are made all too aware that one scene looks much the same as the next. By half-way mark, tedium has set in,

sonality and a Des Grieux of

Julian Gavin's Gallic ardour, the

drama would capture our hearts

McVicar's problem is that, by making minor irritations - the the standard wimp, notwithregional accents, the slapstick ballet - loom larger than they chould

> For Ross Mannion and John Hudson, Manon is a virtual rerun of their ENO Traniata 18 months ago. This is not just a case of similar plots - the social glitter, the blundering father, the pitiful breakdown. The two singers once again fail to strike the necessary sparks. Hudson's Des Grieux is the less culpable, if only because he has the notes and an appropriate air of stubborn naivety. What we need is a sense of romantic abandon, a more melting use of tone colour, Hudson never develops beyond figure in Act 2 - but nowhere do

standing a decent stab at the great Act 3 aria.

Mannion's vocal problems are. no less worrisome than in The Tales of Hoffmann two months ago. The trills and coloratura may be well etched, and her farewell to domesticity is touching but the top of the voice barely exists. What we get is an ugly approximation, and by Act 3 she is starting to bawl: Mannion either needs a rest or a voice-doctor. As for stage personality, I find her ill-suited to Massenet's femme fatale. She may be credibly girlish in the first act, and her underwear reveals a fetching

we giimpse the Luiu-like minx, a innocent as she is duplicitous; nowhere can we say that "to see her is to love her".

Anthony Mee's Guillot is nothing like the lecherous, ridiculous, repulsive ogre he is supposed to be. Indeed, the production bypasses a whole world of frivolous divertissement, so that the three supporting "actresses" have barely a chance to register their presence. Ashley Holland demonstrates his value to the company with another strong performance as Lescaut, and Christopher Booth-Jones makes an equally believable De Bretigny.

A.C. artfully intercut with fine perfor-

radio broadcasts of the time were

And yet, at the very time that we have allowed adult influences to turn children

into such ghastly little

sophisticates, our society

angelic childhood innocence. The myth is a necessary part of the process sustaining porary hysteria about sexual relationships between adults and children. Destroy it and you destroy the foundations upon which that hysteria depends: if children are not sweet little innocents but sexy know-alls, is it have sexual relationships with them? If sex with someis okay, how immoral would it have been the day before?

tion of The Spice Girls is to not even address the subject. but would it not be a good discussion of the matter watch a seemingly incompatible mixture of naivety and grammes which touch upon like any other?

There are plenty of project discuss this matter lying beyond the problem of placement in the community and placement in the community it, in one way or another, but the central concern the morality of sex between adults and children - is never broached. The standard response is: "Well, we has also fostered the myth of all know it's wrong, don't

ut that was not the attitude in the widely admired civ-ilisation of ancient Greece. There, beterosexualthe propagation of the spe-cies, but true love was what went on between man and boy. On other aspects of ethics we regard the thinking of the ancient Greeks (despite their dependence upon slavery) as brilliant and seminal. So are we right in our hys-The most appalling aspect terical reactions regarding of this is that television will paedophilla? Perhaps we are,

Failure to discuss it means that programmes such as

this week's Panorama scramble down to tabloid level and extend the confusion between paedophilia and murder, or at least conflate the two as though one necessarily involves the other. This programme, headed "Defend The Children", was, as usual, not about paedophilia. It was about public reactions when men convicted of child sex abuse - and in this instance murder - are released into

Of course what was done to Jason Swift; the child victim in this case, was hideously wicked. But that does not make the sight of a screeching lynch mob on Panorama pretty, nor does it serve the need for a rational

nity: paedophilia. I have seen only one programme which had the courage to break down the taboo and begin to discuss the subject. and that was The Devil Amongst Us, shown earlier this year by Channel 4. It was produced by Kevin Toolis and written and presented by Dea Birkett.

Even this brave woman felt that she had to adopt a tone ranging from incredu-lity to downright hostility when she spoke to paedo-philes, but at least she did speak to them, asking what their feelings were for chilwhy they did what they did. Compared with the sort of open discussion we expect from television on other ethical matters this, too, was severally limited. Yet it was a can only be seen at present

the lynch mob at the start. Channel 4 continues to plough its lonely and coursgeous furrow today when it screens Mark Forstater's programme, The Lolita Story. This is chiefly concerned with Nabokov's book, his difficulty in getting it published until it was taken

dramatic advance on the

standard programme where

up by the Olympia Press in Paris, then the hostility towards Kubrick's 1961 movie, and the controversy surrounding Adrian Lyne's new film version, which is being launched into the teeth of "the paedophile crists". Astonishingly and gratifyingly the new Lolita has been given a certificate in Britain at a time when nobody can be found to distribute it in the US, so, in a reversal of normal events, it

on the east side of the Atlantic. The 1961 film will be shown later tonight on

Unfortunately The Lolita answers the most difficult question prompted by both movies which is: why use sexually well-developed actresses for Lolita when the whole point of Nabokov's story is Humbert Humbert's fascination with the child? That aside, however, there is more sense talked about paedophilia in this programme, largely by Jeremy Irons who plays the 1998 Humbert Humbert, than in half a dozen normal current affairs

## The car dealer on your doorstep

Michiyo Nakamoto finds there is still a place for the traditional door-to-door salesman

The door-to-door car an can still sell you me. He has long been a key figure for car buyers, often building a lifetime relationship with a customer.

try's social fabric and the severe slowing of the economy could exert severe presre on his livelihood.

It seems a far cry from the salesman's heyday. Traditionally the sales pitch would often start with a postcard. Then, a week or so later, there might be a ring at the doorbell from the man from the local Toyota

The salesman would often visit in the evening, when the housewife was at home preparing dinner and discass the weather or a new road running across town and only broach the subject of a new car after such

Even if the castomer showed no interest in buying, the salesman might offer to check the irregular lighting in the display panel or recommend a reliable

The idea was that the salesman should build a relationship with his customers lasting a lifetime. It was meant to begin with the first no-frills car bought at the age of 18, the legal driving age in Japan, and to he maintained through to the family station wagon and then the upmarket saloon complete with navigation system favoured by the rell-heeled elderly.

Today Japanese car salesmen are expected to visit as many prospective customers at their homes as they can. which could be 200 a day.

Among the tricks they used would be to look at a mandatory car inspection,

ou don't have to go trade in their cars. If the cities, where housewives do pitch.

The system worked well, particularly in the countryside, where personal relationships count for more than function and style when it comes to making a big purchase. It is not uncommon in rural Japan for people to buy one Nissan after another, because they have always bought from the local dealer.

During the 1960s and 1970s, when the demands of a rapidly expanding economy left little time to cultivate personal tastes or dis-

> People are no longer happy driving the same car as Mr Tanaka next door

tinctive lifestyles, many people found it easier to rely on the local dealer to make the choice for them.

All that was required when it was time to change cars, was to call Mr Watanabe from the local dealer often the man who had sold you your first car.

The relationship between dealer and customer was such that by the late 1980s. during Japan's so-called "bubble economy" when asset prices rose to astronomical beights, it was not unusual for a well-to-do customer to call up his dealer and order the most expensive car available without

But as the economy has ground to a virtual halt, and as urbanisation has spread. affecting not only the Japanese landscape but also the nation's social fabric, selling requires different methods. doorbells of Japanese

having seen it first.

to a showroom in required inspection was not necessarily stay at Japan to buy a car. coming up, the salesman home, populations move would use it in his sales more frequently than in the countryside and neighbourhoods can change dramatically through urban development, it has become difficult for dealers to rely on house-to-house sales.

and fickle. People are no longer bappy driving the door. Even older couples bave spent time overseas and are opting for offroad recreational vehicles, or imported cars, rather than the sedate Japanese-made saloons that used to be their standard choice.

Among urban and subur ban consumers, cars are becoming a personal state-ment, an expression not just of social status but of lifestyles. Consumers will seek out the car they want before

the dealer seeks them out. While the practice of house-to-house sales has not died out, Japanese car companies are increasingly finding that the results do not justify the costs of their traditional services. The average number of

cars sold per salesman can be as low as four a month at some dealers. So dealers are changing tack. They are trying to persuade customers to come to them instead. To do so, they organise special events, such as seminars on "how to make the perfect small garden", which aims to capitalise on the recent gardening craze in Japan. The spread of the internet

is also forcing marked changes. Car companies have set up home pages where prospective buyers of cars and obtain detailed information. Last year, Nissan took orders for a special model through the internet. If that is the way of the future, there will soon be far

all:

Gardening

## Rustic tweeds give way to City elegance

Brenda Polen admires Daks for moving from classic clothing into fashion

quite erroneously, to associate the Daks label with robust country pursuits, the kind which call for windcheating, hairy tweeds, conservative, camouflage checks and rugged, dun-coloured trousers. After all, its origins are possibly the least glamorous of all luxury brands. In the fashion industry it is a tale told both with amusement and with a kind of wonder at the marketing innocence of an earlier age.

It tells of how, in 1834, Alec Simpson, son of Simeon . Simpson, the founder of the company, invented the "self-supporting" waistband, making, in one fell stroke, both belt and braces redundant for anything but decorative purposes. Alec knew he had a winner and, even before one pair of the revolutionary trousers reached the market, his Stoke Newington factory had turned out 100.000 pairs.

But what to call them? Today, a team of expensive marketers would spend months developing a concept and focus-group testing it to a certainty. Back then Alec decided that the American word for casual trousers, alacks, was hip and that, in tribute to his father, who had died at only 54 two years earlier, he would elide it with "Dad" and get Daks. To modern sensibilities anything less sexy than Dad's slacks is hard to imagine.

Yet Daks (and Simpson) has managed to survive the delicious embarrassment of its name. In the last decade, it has done much more than that, expanding the brand to

ne tends, not of men's, women's and children's clothing and accesso ries. And, in a reversal of the journey made by the big-name fashion designers, it has reached out from its rural and weekend base to conquer the city and the working week. It is planting its flag this month by open-ing its first shop in Queen Street in the City of London. At least, that's how it

looks. Jeremy Franks, the affable and urbane ex-Guards officer who is chairman and chief executive of Daks Simpson, demurs. "We are really returning to our roots," he says, "Simeon Simpson started out as a taifor in Middlesex Street in Whitechapel in 1894 but he was ahead of the game even then. He supplied top-quality hespoke suits to unmarket shops: a made-to-measure suit took five days but for weddings or funerals he would do it in 24 bours." It was Alec, however, who

was to take the company into ready-to-wear and into retailing, opening in 1936 the Simpson atore on Piccadilly with its curved windows and imposing Travertine staircase. Designed by Joseph Emberton and Lazlo Moholy Nagy of the Bauhaus, it left the rest of London's great stores looking like dowdy Victorian matrons trying to keep up with a bobbed and

In 1940 a German bomb forced Daks out of Stoke Newington and north to Nottingham and Larkhall near Glasgow. After the war, a Larkhall. Today it employs 1,700 people who, together with the 410 at the factory at Polbeth, opened in 1966, pro-

duce 25,000 pairs of trousers, 1,500 skirts and 15,000 "sleeved garments" every week. "We are," says Jeremy new factory was built at Franks, "the only great British brand which manufactures all its clothing in Britain from British fabrics." in doing so. Daka manages

to undermine all the fashion industry's fast-held beliefs that costs in industrialised nations are prohibitively high and only the developing world can deliver at a competitiva prica, Because one of the most extraordinary things about Daks is its

prices. "That's because we are based in tailoring and men's wear," says Franks. Traditionally, men expect high quality at a sensible price. It is only in the world of women's wear, with its haute couture history, that customers have been persuaded to pay over the odds for intangibles like label Label cachet is at the

haert of Daks's corrent prebut not of the glamorous kind. One tends to link it in one's mind with brands like Burberry, Aquascutum and Austin Reed, the brands which rely on quality, an upmarket rural tradition and esoteric identifiers like "house checks". The latter has always seemed to be a rather crude device which exploits peer group snob-bery. But Burberry proved in the 1980s that peer group snobbery can expand very profitably into "aspirational"

In addition, however faded giamorous label may eventually become, its cachet was Originally earned by innovative or exciting design. which expressed the spirit of the period when it made its name. That is the kind of cachet Daks cannot aspire to. What it can do, however, is what Jaeger under the design directorship of Jean-nette Todd nearly pulled off. It can gradually reposition itself in the marketplace and public consciousness. But that's a difficult path. Too swift and radical a change risks sacrificing established business for uncertain gains. Yet when you move from

classic clothing into fashion, too much caution only confuses everyone, Jeremy Franks was managing director of Daks Simpson (Menswear) in 1985 when the Simpson family sold the company to its Japanese Group. He was appointed chief executive and given the green light to direct a major revival operation. Rifforts had been made before to update Daks but to tive and haphazard.

One of the moves in which Jeremy Franks takes most pride is his appointment in 1998 of his women's wear designer, Joyce Dixon. A pri-zewinning graduate of the Royal College of Art, Dixon's CV includes a period design-ing conture at Maggy Rouff in Paris and powerful jobs with Feminella, Aquascutum and Hartnell. It is she who has updated the classic country clothes and injecting just enough fashion awareness, has developed a sleek, urban element. These servative in concept and fabrication, but then Daks's strength lies in its tailoring. Dixon did not have the

dressing" route which currently dominates fashion. money on the consistency of professional women's loyalty to the lacket and the formal. workaday suit. If some of the styles in the range look staid to fashionable eyes, others, especially the high-buttoning long lackets with their pencil trousers, look fresh.

The return to sharp tailortions from cutting-edge Gucci and Alexander McQueen, is probably overdue. And it is undepiable that many working women decided to wait out the soft dressing phenomenon in their authoritative business suits and others opted for

"Since we brought in Joyce," says Franks, Cour women's wear business in Europe has overtaken the men's. We know we have to from foreign parts, we are attract attention to the doing very well."

brand and we think the shop in the City will contribute to this. It will carry men's and women's weer and accessories and it will offer a bespoke tailoring service as well. We are also taking an idea from America and offering customers an 'at your desk' service. That's because, although we would-hope to attract a good lunching, present in recent collec- know that many of our potential customers are

> Daks may be a company secure in its history of traditionally British classic clothing, he implies, but it is, in many ways, as modern as tomorrow. "You know," he says, "this business about New Britain is not nonsense and hype. We are innovative, creative, forward-looking. The weak have gone and the strong remain and, against considerable competition

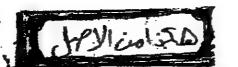

"Doing very well" is the kind of restrained, very British phrase which suits Franks and Daks nicely. They do not want to take on the stars of fashion's firmsment. That's not the kind of attention they want. But then, it's not the kind their Square Mile crave cither.

# How to Spend It

te UK's crammed urban streets are a joy for the scooter industry to behold. For those traffic jams have helped make Britain the world's fastest-growing scooter market - sales of 50cc bikes in the first quarter of 1998 were more than double those of the same period last year.

Manufacturers have borrowed a "plug and play" approach from the computer industry and are promoting their fully automatic scooters with a "twist and go" philosophy: if you can sit upright and open the throttle, you can drive a scooter. This user-friendly approach has attracted more women and older users, and makers have also begun to turn them into style-statements by slicking up the colours and adding accessories.

Claude Agius has seen it all before. His father began importing Vespas in the early 1950s, making it easy for Agius himself to become part of the 1960s scooter craze associated with the Mod movement. "Apart from the odd skirmish with the Rockers we were basically a pretty peaceable bunch. But with 800 Mods on a rally there were bound to be a few problems, and then the press really blew the violence all out of proportion," he says.
The reputation that

resulted led to the marginalisation of the scooter as a means of transport.

In the 1990s new importers and new models have been coming to the market regularly, but only in the last three years have sales really taken off. The surge is due partly to better design and marketing and partly to consumer desperation, as people can no longer bear to commute by car or public trans-

As the postwar originator of the concept, Plaggio is the most established manufacturer, and has the biggest range of models, from the high performance Gilera to the retro-look ET4 and the traditional T5. But the real surprise has been the phenomenal sales growth of Peugeot scooters after their laumah in the UK only three years ago. Benefiting the high brand recognition and the large dealer network of the automobile arm of the company, its Speedfight 50cc and 100cc models were the best-selling accoters in the

## City break/Budapest An atmosphere of anti-climax

Richard Donkin finds a people unwilling to shake off every vestige of the communist past

he garlands of peo-pers and garlic gathering dust and cobwebs above the more traditional stalls in Budapest's last remaining food hall looked old enough to have predated glasnost and perestroika. Garlic bulbs were draped around a photograph of a youthful Lady Thatcher as a lasting tribute to the nemesis of commumain shopping thoroughfare, remind visitors that Hunnism from the ranks of its

It may be unkind to equate those who came through the communist era with the soulless beings that hatched from pods in Invasion of the Body Snatchers, but there is a discernible air of disillusion among the people who occupy the trams and walk the streets of downtown Budapest as it approaches the millennium.

They craved the freedom of the west and the consumerist lifestyles projected on US television programm for so long, the last thing anyone expected when westem-style democracy finally

Below stairs in the food hall the fishmonger was clubbing a carp from his tank in the same sort of way he must always have done. Even the street outside retained its communist-era drahness. Only the peep shows and the porn pediers, interspersed among the fashion shops of Vaci Utca, the

should be interpreted neither as xenophobia nor as a rose-tinted view of commu nism. There will be no goingback. But the east still suffers the after-shocks of its headlong leap into capitalism. You can see it in Budapest, a palpable zeispeist, committed to the future, but

British Airways and Maley, the Bangarian airitne, both run two flights a day from London Heathrow range from £238 to £642

## The naked truth in a French spa-

Simply everyone's wearing black – black mud that is, says Alice Rawsthorn

seared all over my torso, I wondered idly whether I resembled one of those blue-painted figures in an Yves Klein 1960s art installation; until I realised that I looked much more like Swampy, or a fellow eco-warrior, after a particularly arduous day's tun-

nelling. I did, at least, have the consolation of being coated not in just any old mud, but a rather rarefled strain dredged all the way to France from the Dead Sea. What is more, the mud had been smeared on top of a blend of salt and citrus indignity of having been

tic sheet, like a chicken giblet destined for a Kentucky Fried oven.

After half an hour or so haking (thankfully at a nonlife threatening temperature) the mud was bosed off with a blast of ky water. My skin was left feeling, well, as soft and fresh as all those glossy magazine articles on the merits of Deal Sea and beauty treatments promise the Will free to

Pleased with the result. I vowed to treat myself to regular mud-scrubs back in London, even though I knew I would never find time to fit them in. That is why it makes sense for me to spend a weekend somewhere like Hotel Royal, near the

right" sort of nationalism part of an ideology dating back to the 1980s when local costume, song and dance started to be promoted by the state. "Be from life and yet go up

on to a higher plane than life itself," is what the guide says was the philosophy behind the project. Whether or not visitors to the place feel they are on a "higher plane" is anyone's guess. But they are certainly enjoying themselves, having a go on the drums, sitting on camels or trying their hand at a bit of weaving.

The odd thing is that most of them are Han Chinese (judging by the amount of times I am photographed, "foreign devils" must be thin on the ground). This seems strange given that in parts of China populated by minorities, Han show little interest in their cultures. In Tibet, Chinese state

Modern inventions are put to clever use to help entertain the tourists

workers have to be paid supplementary wages and given extra holidays to persuade them to move to a place many consider a berbarian wasteland. And yet here they are in Shenzhen, lining up chearfully beside Mongolians, Uighurs and Tibetans to have their picture taken.

Before returning to the tour bus. I look in on the costume room, where examples of traditional dress are displayed. Colourful and lavishly decorated, these garmarks of China's different ethnic groups - and have been the most sensitive politically. Forced to don Mao suits during the Culoffences committed during a tural Revolution, ethnic minorities are today expected to wear their national dress at official

functions. It is time to leave. As I make my way out of the costume room, I notice that music is being piped out from muffled speakers inside the building. The song: a badly orchestrated version of "Born Free".

ne of the most remarkable sailing ships ever built isn't displayed in a dry-dock at a maritime museum. She is a four-masted, 29 sail tall ship, still at work on the open seas. The SY Sea Cloud was originally commissioned by the tycoon E F Hutton for his wife, the heiress Majorie Merriweather Post in the late 1920's.

The Huntons set out to create an incomparably opulent vessel and succeeded beyond imagination. Accustomed to the very linest things in life, Majorie Merriweather Post undertook the interior design of the yacht with a relish that resulted in the most luxurious of fittings - interiors are panelled in carved oak, fitted with Italian marble and elegantly furnished with antiques. Parquet floors shine and burnished brass still glows. Original marine oils grace the walls.

One of the largest sailing ships in the world, the Sea Cloud is 316 feet in length. Her masts reach a height equivalent to that of a 20 storey building and 34,000 square feet of canvas unfurl to create one of the most magical marine sights imaginable.

CRUISING THE CARIBBEAN SEA Sailing with her today is as splendid and thrilling as it was 60 years ago when she was first launched. You will sail with just 60 fellow guests and once under way the Sea Cloud provides an experience no conventional cruise ship can possibly emulate. We'll heel lightly as the wind fills our sails and overhead nimble crew members climb hundreds of leet among the rigging, setting and adjusting. The Sea Cloud, though equipped with auxiliary engines, is capable of great speed under sail. Her broad yards and narrow beam account for an average cruising distance of over 150 miles a day.

How better to explore the beautiful islands of the West Indies, than abound the most elegant tall ship ever built as she sails through Cambbean Sea on one of the world's most romantic ioumeys.

## THE ITINERARY

Day 1 London Gatwick to Antigna with Bonish Airways. Embark Sea Cloud and sail. Day 2 Day at sea. Sailing south past the

## Horses ride to the rescue

Gillian O'Connor looks at how one of Portugal's poorest provinces is trying to woo tourists

share, while the farmer walks behind. So much for the idea that the Common Agricultural Policy has turned all Europe's farmers into plutocrats.

It is hard to imagine a more medieval sight. But the man with the mule - and it is a beautiful mule - is well off by local standards. A few miles further on we pess a second man breaking up pasture in order to plant crops. He is doing the job by hand. using what we decide is a mattock. It makes your back ache just to look at htm.

Portugal is one of the poorest countries in the Euronean Union, and the Alenteld is the poorest province in the country. Covering the area between Lisbon and the tourist-infested Algarve coast, the Alentejo allegedly has fewer inhabitants now than when the Romans and Moore settled there.

The authorities see tourism as a possible salvation. but want to make sure this time they do not destroy the environment to save the

single plough nature reserve. Somehow putative tourists have to be encouraged to go inland, or explore the coast in ecologi-

cally friendly ways.

The answer is horses. Or, at least, Sheila Greenfield hopes it will be the answer. Her parents were among the original wave of north European settlers in the Algarve and admit to some share in its subsequent development.

he Alentejo is home to the ancient breed of Lusitano horses sure-footed little battle chargers which the Portuguese took with them when they set out to conquer the world. Why not bring the tourists to explore the Alentejo on Lusitano

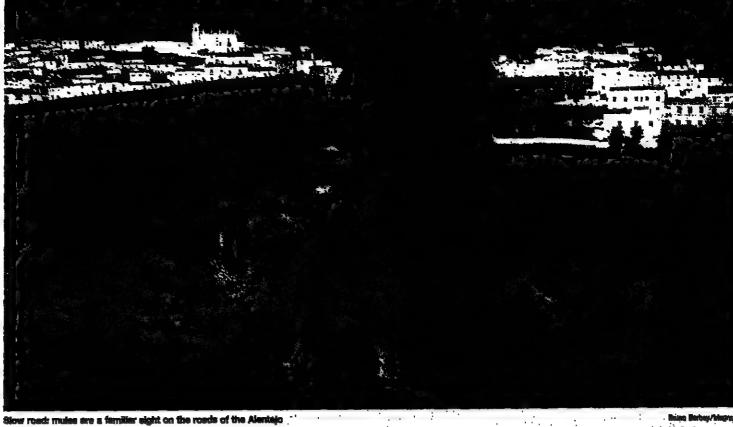

not a natural gladhander. Tourists require jollying and organising, as Sir Billy Butlin worked out years ago. What she needed to make her trail-riding centre a success was someone to deal with her visitors: a smoothie to make them feel they are having a wonderful time,

he mule pulls a line has been turned into a schedule. That is the job Robert Lee, her partner, performs to perfection.

Six and half feet of Irlah blarney almost conceal the determination underneath. "Hey, guys...," Robert's arm ds a lot of time caressing the shoulders of the nearest guest, male or female. He and his small team of guides meet visitors at the airport, settle them into their hotel and sort out an appropriate horse. "Safe with an accelerator and brakes? No problem."

The benevolent nannying continues throughout the holiday. Different schedules are available. All start with the group of visitors being picked up by minibus and driven across the estuary and into the foothills to the farm. Your attention is One snag is that Shella is divided between the storks and egrets outside and the tempting fragrance of the breakfast rolls in the beek.

Even in January the meel is served on the open versudah of the farmhouse, with the Cercal mountains - hills really - on one side and open plains on the other. while still sticking to the

## FT BY INVITATION Indian Heritage Tour

with LOUISE HUNTER, FT DIRECTOR 30 October - 14 November 1998

The FT invites you to experience India through the lives of past & present day dynasties on this unique and exclusive hosted four. Private audiences with members of today's Indian Royal families have been specially arranged to complement visits to the magnificent Chola temples of southern India, the splendid Mognul palaces and forts of Rejasthen and the impressive Jein temples

To enhance your appreciation of the country Louise Hunter, FT India Director (1990-1997), will accompany some of the programme and share her personal experiences of working in India.

Befitting this special programme, accommodation is provided at selected heritage properties and prestigious hotels. A few days will be spent relaxing in the beautiful hill station of Kodaikanal and culminating at the magical Lake Palace in Udaipur. To receive full details and a booking form please complete the coupon below or telephone Sarah Jezzard on +44 171 873 4816 Fax: +44 171 873 3595 Email: sarah.jezzard@fl.com.

# A legacy wearing thin

Giles MacDonogh spends a night in dowdy splendour

new refinement entered European hotels in the second half of the 19th centory: the railway had arrived and sounded the knell for the rough-and-ready coaching inn. The path was now clear for the development of the grand or palace hotel which reached its apogee around 1900. That date accounts for

some of the more sumptuous. architectural styles represented by the best of them: pristine neo-classical forms or puritanical neo-Gothic had given way to an exuberant neo-Baroque or Rococo. Art nouveau was another possibility. In Portugal, architects revived the native Manueline style which had flourished at the time of the voyages of discovery.

The greatest example of a neo-Manueline hotel building in Portugal is the Palace in Bucaco, near the old university town of Coimbra. almost all grand hotels exist in important cities, spa towns or in seaside and sporting resorts: Buçaco is none of these.

The hotel was constructed in the centre of a primeval Carmelite convent, dissolved in 1834 when Portugal by their decided to banish its reli- vaults. gious orders. •

It was here that Viscount lington, bided his time, dossing down in a monk's cell, before he scotched Massena's army in September 1810. The French general lost 5,000 men in the battle which marked the beginning of the end for Napoleon in the Peninsula. The olive tree to which the Iron Duke tied his horse is still there.

The man credited with the idea of turning Bucaco into a palace-cum-hotel was Ferdinand of Saxony-Gotha, the German consort of Queen Maria II. He had already commissioned a splendid Palacio de Pena in Sintra. With his children's backing, architect Luigi Manini was by Alexandre d'Almeida, lery on the dining table is no

## FOOD AND DRINK

## Cookery Why artisan cheesemakers can celebrate

Philippa Davenport takes a swipe at some of the methods used in intensive dairy farming

sheep since the dawn of agriculture and ewe's milk has been used to make cheese for almost as long. In countries with suitable terrain, the cow eventually took over from sheep as the main provider of milk because its yield is higher and, although the fat content is lower, the fat globules are larger. This makes it more convenient for cream and butter-making

NAME OF

Britain's most famous cheese, cheddar, was already made using cow's milk in Tudor times, but sheep milk remained the norm for drinking, butter and cheesemaking until much later. In isolated pockets of Scotland and Wales, ewe's milk cheese continued to be made until the beginning of this century. But, by and large, for the past several hundred years, British cheeses have generally been made with

As we approach the millennium, the tables are beginning to be turned. Cow's milk cheeses still dominate the marketplace but many of the most highly prized British and Irish cheeses are now made from the milk of sheep or gost. Why? Like many of my compatriots, I have become sadly wary of dairy products made with the milk of the average British cow.

The intensively farmed herds of our dairy industry. have been turned into fourlegged milk tankers. Bred, medicated and fed to produce ever more milk, the poor beasts stagger-under the weight of swollen udders, often half lame and suffering from back problams. Intensive dairy farms the cow and her milk are true that they will browse have been identified as innocent per set Could it not and graze in places inacce-major polluters of water in be that the cause of such dis-

## PROPERTY

## Standards that are oceans apart

Anne Spackman looks at the differences between the letting and renting experience in the UK and the US

one side of the compared with just 10 per cent of problems, such as a broken Atlantic they sent their agent flowers; on the other they sent a letter of complaint. The Edwards family found big differences between the letting and rental experience in the

Alan Edwards has worked for the Ford Motor Company in Europe and the US. When the Michigan, they let their home in England and rented a home in

When it seemed likely they cern is selling houses. would be staying in America, they bought a house in Michigan only to find he was to be transferred back to the UK. Now, they are living in their Essex home and renting out their American rent of £2,800 a month. The property.

Anyone moving across the Atlantic with their job is likely to receive advice from their company about renting homes on the other side of the ocean. The information usually covers where to look, how much to pay and how the systems work differently in the UK and the US.

But as often as not, it is the unwritten laws of the local property jungle which have the heaviest impact on people's experience. This has certainly been the case for the Edwards, who have been landkords in both countries and tenants in one.

It has been a time of contrasting experiences. While they have been sending bouquets to their American managing agents in gratitude for their service, their most recent correspondence with their UK counterparts has been in the form of a solicitor's letter.

"In England we have paid twice the price for half the service." That is how Francesca Edwards sums it up.

The main difference between the lettings industry in the two countries is that in the US it is a thoroughly professional, competitive business, whereas in the UK it is just emerging from an essen-

the UK's far smaller population. Until recently, it was rare for English families to rent homes after their student years. Even now, it is likely to be a one-off,

short-term experience. The large growth in investor landlords, particularly in central London during the last five years, has caused the lettings industry to smarten up its act. family moved from Essex to But outside the capital - with a few honourable exceptions - it still tends to be a sideline for estate agents whose main con-

> When the Edwards approached the main local estate agents in their part of rural Essex, the agents initially suggested their country house would command a

### 'Wear and tear clearly means something very different in the UK and the US'

Edwards were astonished at such a high figure but suggested they

In the two months before they left for the US, only two potential tenants came to view, so the Edwards asked the agents to drop the price. The house was not let until 10 months later at less than half the original figure.

Given the far lower price, the Edwards asked the agents to make it part of the letting agreement that the tenants be responsible for the upkeep of their garden and swimming pool. The normal deposit of six weeks' rent was paid by the tenants and the agents charged a lettings and management fee of 15 per cent

indistinguishable from the vegetable garden and the swimming Around 20 per cent of people in pool in need of a complete acid

shower head, yet what upset them most was to find the plugs for the washing machine and vacuum cleaner had been cut off. "It felt like an act of vandalism,' Francesca Edwards said.

The tenants had left a month before the Edwards returned and the agents had given them back their full deposit. The agents said they felt the house had only suffered reasonable wear and tear.
"'Wear and tear' clearly means something very different in the UK and the US," said Mrs

As tenants in the Michigan suburb of Bloomfield Hills, the Edwards said it was part of the culture for tenants to leave their rental house in tip-top condition - or forfeit part of their deposit. This meant not just a full clean carpets included - but touching up paintwork as well.

Then, two months after buying a Michigan home Alan Edwards was posted back to Europe. They decided to keep the US house, as they might one day return.

Their US letting and manage ment agents, D&H Income Property Management, showed four potential tenants around the property in the first week and agreed a rental of \$3,000 a month.

"I was asked by the agent to go round the house and state everything I was leaving and make a note of anything unusual or difficult. For example, I pointed out how to clean the wood floors. I felt I was being asked the right questions," said Mrs Edwards.

Shortly after the family returned to the UK, the boller in their US home broke down. The managing agents not only found quotes and fixed it, but even wrote, on their own initiative, to the insurance company, which contributed \$800 towards the cost. They have also dealt swiftly

"I feel I am getting a good ser vice - plus a bit above and beyond," Mrs Edwards said, "and their house they found the lawn. I am only paying 10 per cent. I sent them flowers to say thank you. I can't imagine anyone feeling moved to do that in

## Renting - an unofficial guide

### Deposits

Tenants in the UK pay between one and six weeks' deposit, with four to six weeks being the norm. Francesca Edwards said she would advise UK landlords deposit could only be returned with their personal approval.

In the US, tenants can expect to pay a six-week deposit, though terms vary from state to state. Deposits are covered by a Security Deposit Act, which means clients' money is protected - which is not always the case in the UK. Only 40 per cent of UK agents are members of Aria*, the professional lettings association, which requires all

In the UK, agents normally charge 10 per cent for a lettings service and 15-17.5 per cent for lettings and management – plus

Most agents deduct their fee

from the monthly rental; in central London they sometimes take

In Michigan, landlords normally pay one month's rent to the agent for letting the property and 10 per cent for the service thereafter. In cities such as New York, the fees are likely to be around 15 per cent for upmarket

Stewart Segal, president of Sotheby's International Realty, says many US agents see their lettings and management operation as a marketing tool which helps attract new sales busi-

### Complaints

Landlords and tenants who feel they have been unfairly treated in the UK can pursue their complaints in the small claims court. However, they will be liable for their own legal costs. If the complaint is against an Aria agent, they can contact the association, whose disciplinary committee can recommend - but not order

in the US, people with com-plaints go straight to their law-

yers - as do agents pursuing bad tenants for money or damages Francesca Edwards believes the fear of a lawsuit is what makes everyone behave in the US.

### Wear and Tear

Agents in the UK expect a property to be returned in a poorer condition at the end of the rental and see it as the landlord's duty to smarten it up ready for the "I don't know of any tenant

who has offered to touch up the paintwork," says Robert Orr-Ewing of Knight Frank, who is on Arla's national council. Knight Frank carries out querterly checks to ensure properties are being maintained; some agents make checks every six

In the US, the agent is likely to

will expect small incidents of the phomber had rung to say he damage, such as marking a would be there in five minutes. kitchen counter-top, to be repaired at the tenant's expense. in both countries, the higher the rental, the higher the standard of behaviour expected:

### Services

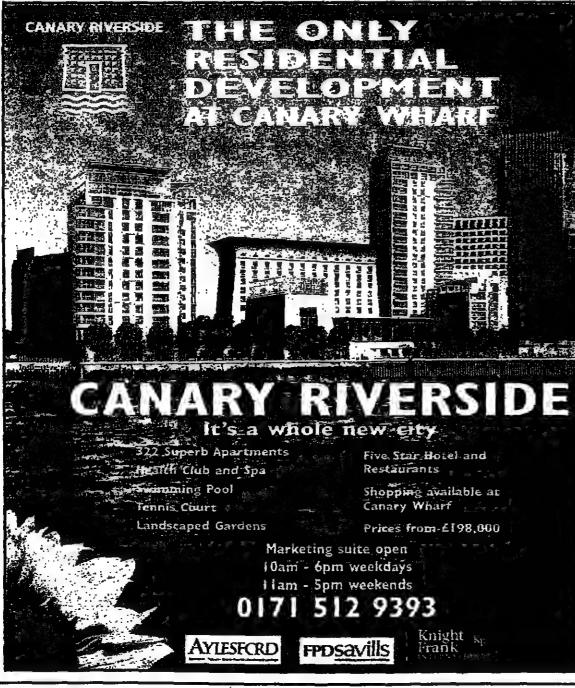

Managing agents should have a plumbers and electricisms to tenants when there is a problem. It is worth checking this with an agent before hiring them. If you are using a small agent, it is also important to check they have a back-up person when the main letting agent is away.

Large firms in London have speeded up their services in recent years, partly as a result of pressure from overseas tenants. "They are not airsid to use their mies as a lever," said Robert Orr-Ewing, "which helps to concentrate the mind."

While he was speaking to me tenant called to say he wanted a plumber within 15 minutes. We are using people for perhaps ziz joba a day, so when there is a take pictures of the property, real emergency they will drop including key items of furniture, everything," he said. By the end before the tenancy begins. They of our 15-minute conversation, ■ For Aria's guide to Trouble-Free Letting, send on SAB to Aria Administration, Maple House, 51-53 Woodside Road, Amersham Bucks EP6 6AA

## PROPERTY

he Scottish prop erty market is mixed. Pife is sluggish, probably because of high local unemployment. but country cottages are selfing well, says the latest report from the Royal Institution of Chartered Surveyors in Scotland.

 $\mathbf{L}(\varphi) = e^{it}$ 

The hottest spots are the West End and the New Town in Edinburgh, and Hyndland and other parts of Glasgow. Elsewhere, road improvements have helped local markets. Thanks to work on the A96 there is more demand around Kintore and Blackburn, north-west of Aberdeen, and extending the M77 has had the same effect south-west of Glasgow around Kilmarnock and Ste-

warton. But compared with England, Scottish houses remain excellent value. On Iona in the Hebrides, where St Columba founded a monastery in AD563, Alexander Dawson in Oban (01631-563901) is selling Iona Cottage near the pierhead

(for the ferry from Mull). It is a remote part of the UK, but many people visit the island and its (Christian) Iona Community in spring and summer. "Being pilgrims," says the agent, "they do not harm the spirit of the place." With four bedrooms, the cottage is ideal for bed and breakfast business.

reople

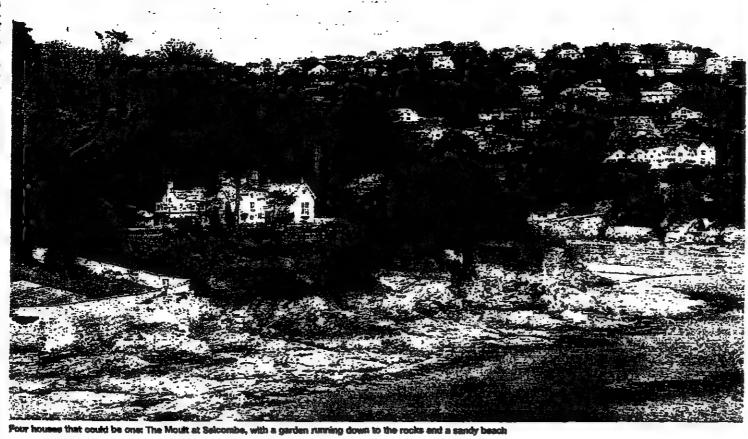

In the Scottish system, the agent asks for offers over £160,000 with a closing date of May 27.

On the east side of Scotland, another snip to English eyes is a solid family residence called Ruthvenfield House at Huntingtowerfield by Perth, where Bidwells (01738-630666) auks for offers over £315,000.

And in Edinburgh, Rettle (0131-220 4160) lists two Georgian terrace houses: for offers over £195,000 for 11 Hailes Street; or over £290,000 for 18 Warriston Crescent, where the garden backs on to the Water of Leith, Edinburgh's river.

### By the Thames Living by the Thames

always commands a premium, especially if the House, near Maidenhead, is house is the only surviving an Edwardian pile across the pavilion of four that Sir Christopher Wren built Edward VII is said to have in 1700 in the grounds stayed. Hampton Court on A first-floor flat in the price of £1.2m through too has royal ties.

## **EDUCATION**

# How do you say 'sick as a parrot'?

Simon Targett reviews some unusual language courses available - including one for football fans going to the World Cup

Ealing comedy script. But "French for football fans", it turns out, is an entirely serious language course which BBC Education is targeting at the England soccer supporters who will be crossing the Channel next month for the World Cup in France.

Soon the patois of the English terraces could be heard in vernacular French. Imagine, if you can, British fans bewitching the World Cup host nation's fans for running a home in France" with the gallic equivalents of course the following week. with the gallic equivalents of "Sick as a parrot", "You're not singing any more", and, just in case Alan Shearer is on form, "We are the champions", the chorus of the Queen pop hit which still features in the musical entertainment at English football

Of course, cynics will say the

he title sounds as if it dialect will lose something in summer courses under the ban. This is why City University's guage skills "without encroach- "But they suffer from sixth ing the army, liarding provided was coined for an translation, and yet others will ner "give your French a suntan". business school has devised a wonder whether French spectators would be any the wiser after hearing the famous chants in their native tongue. But for those English football fans who want to give it a try, the course will be available on the internet.

The BBC does not have a monopoly in whacky French courses. Next month Kensington and Chelsea College offers a French course for those buying a house in France and a French

For the unfussy Francophile, there are myriad conventional courses, pitched at every level from "holiday" to "advanced conversation" and understanding modern theatre.

The Institut Français, the official French centre of language and culture in London, runs

There are crash courses and "French express" courses, each lasting 30 hours during July and August, and costing £199. There are also short workshops, at £82, on topics including "news in French", the "panorama of French song" and, for the late-night film buffs, Souries cine-

Other governments run official language centres. The Instituto Cervantes offers "Spanish at all levels", and special summer courses, costing £190, are held between July and September.

The Goethe Institut lays on summer German courses: a 60lesson package costs 5250 and a 36-lesson package, offered in the evening, costs £148. These core European lan-

guages tend to be the most popu-

lar for travelling business people.

series of language courses -French, German and Spanish

Distance running

## Domination breeds dissent

Pat Butcher wonders if Kenya's all-conquering athletes deserve to be victims of burgeoning antipathy

uccess breeds admiration and emulation in some people, envy and antagonism in others. Unfortunately, for the all-conquering Kenyan distance runners. there has been too little of the former of late, and all too much of the latter. A decade of dominating the distance running events, along with the occasional neighbouring Ethiopian, notably Haile Gehrselassie, has given rise to increasingly loud murmurs of dissent. Some have openly accused the Kenyana of drug taking, others have signalled the intent on restricting their participation in races.

It began four years ago when leading promoters on the burgeoning US road race circuit started offering more prize money to domestic runners than foreigners, in an attempt, they said, to motivate Americans to compete seriously against, mostly, Africans. But, as Godfrey Kiprotich said recently: "Last year I won a race and got \$2,500. The first American. far behind me, got \$5,000. How can the American be motivated to run

Alberto Salazar, the last great US male distance runner, agrees with Kiprotich, citing his own experience in the 1970s of having to compete against the first Kenyans Offered scholarships in the USA. Younger than Henry Rono and Samson Kimwomba, both world record-holders. Salazar says he was easily beaten by them in his early college years. "But I gained on them every year, and the year after I graduated I was the top-ranked marathoner and the second-ranked 10,000 metre runner in the world. Since then, I've always believed that one of the best ways to Improve your running time is to compete against the best."

reg Searle presents a

solitary figure sculling down the Thames at

Putney. To move from

intend going a step further. Bill ners was either blooddoping his Reef of the Bolder Boulder event in Colorado has limited Kenyan entrants to three in his race on May 25 (Kenyans took six of the first eight places last year, and eight of 10 the year before). Reef's complaint is that sponsors and race supporters cannot identify with interviews, like their American good results, and the fact that the body under the stress of thin- arrival of the breathing difficulties counterparts, and thus contribute to the promotion of the event. Reaf has justified his stance with: "It's our country, our event, our money.

American sponsors want American

winners, or at least Americans

among the top finishers." There is a serious debate to be had on this subject, as Moses Kiptanui admitted to the Financial Times last summer when we talked to him about rumours of European. track promoters' anticathy towards too many "anonymous" Kenyans in grand prix meetings. Kiptanui recognises that professional sport requires promotion, and that shy Kenyan country boys, unused to western mores, and who may not meak English, well need to be better served by their, mostly Euro pean, managers. But Kiptanul said then as he said of this recent controversy: "This is beginning to

verge on racism." Reef's attitude has been widely derided in the US. A whole programme of the television series "Politically Incorrect" was dedicated to the issue. And an editorial in the New York Times accused him of "crude commercial protec-

tionism". However, that newspaper's athletics correspondent had already contributed a piece on the morning of the New York City Marathon last November, which suggested

Yet some US race directors coaches of Kenyan marathon runcharges or giving them erythropoietin (EPO), both of which practices significantly improve perfor-

mence in endurance sports. Unlike many other areas of suspicion in athletics since Ben Johnson and the dissolution of East Germany, this accusation has no Kenyans, who do not give upbeat foundation other than consistently coach in question is a medical doc-

In simpler times, runners

In simpler times. runners employed more naive aids to enhance their performance

employed more naive aids to enhance their performance. Sprinters ran in sand, or with weights on their shoes, or in a harness pulling heavy roller behind them, the theory being that, liberated from these restrictions, they would fly to the finish line. Distance runners were equally resourceful. Some would wear two or three track suits, in order to sweat their way to the verge of anorexia, and a bet-

ter power-to-weight ratio. Others, like Dave Bedford, trained in army boots with a rucksack full of books. The great Emil Zatopek personalised his resistance strongly that one of the leading training, by running with his wife,

Dame on his back. Since she was sh Olympic javelin champion, that was probably a safer alternative for the Bouncing Czech than any incentive that she might consider.

The Kenyans too have their gimmicks. They already begin with a huge advantage, which is the altitude of the Great Rift Valley. where most of the more successful runners come from. Conditioning ner air means that when the runcar. But the most recent innovation is a refinement of Salazar's philosophy of "competing against the best" - the setting up of permanent camps for communal training. Running is a radimentary sport,

as rudimentary as life in rural Kenya, doubtless one of the reasons why the two go so well together. It is ironic to listen to Kip Keing, the first great Kenyan champion, 10 years after Zatopek, talk about grilling his foreign contemporaries on their training meth-"Whenever I travelled abroad, this was my priority. I simply fild not know. I would go to the training track with my stopwatch, and time them. I needed to learn as much as possible." Now the foreigners come to Kenya.

Dieter Baumann of Germany has been training there since before ha won the 1992 Olympic 5,000m. He had just left when we arrived for a visit in late January, at the same time as Jane Salumae, the Estonian marathoner. These camps assembling the best Kenvan cross country runners to train together for a month prior to the world championships. The Kenyans have won the senior men's team title (and most of the other) titles) for the last 13 years

During a week of travelling, from the Nandi hills on the sestern fringes of the Rift Valley, to the Cherengani hills, close to the Ugandan border, two experiences particularly underlined the reasons for

Kenyan domination. The first was a training run from the floor of the Rift Valley, which is already 1,500m above sea level. A 400m jog is sufficient to remind a new when running at altitude. Four local athletes, admittedly worldtrack, every step of it uphill, finishing in rain clouds at an altitude of 2,800m. Their time of 85 minutes would be good for a world-class woman athlete running on the flat

A week later, the hitherto unknown Philip Terus finished 11th in the Armed Forces Cross Country, behind a string of luminaries, such as Paul Tergat, Paul Koech, Ismael Kirni and Tom Nyariki. Tarus then drove for six hours from Nairobi to Eldoret, the heartland of the Kenyan running community at 2,100m above sealevel. At 9.30 the next morning, he won the Eldoret Half-Marathon in 62min 02sec. This is over one minute faster than has ever been run at altitude.

at sea level.

It may wall be that some Kenyans take drugs, although given the spartan nature of these camps. and the close communal living, it would be hard to keep the secret for long. Such conditions in remote rural areas do not sit easily with have grown out of the practice of western athletes accustomed to sophisticated creature comforts. So catching up or even keeping up with the locals is not going to be an easy task. Then again, the Kenvans have another unbestable gimmick. They train harder than any one I have ever seen.

Michael Smith

## A study in black and white

natch days I wear short my children aged one pwards to wear the United strips I have lovingly bought for them.

Today, then, should be one of the big days of my life. We are in the FA cup final for the first time in 24 years and have a chance, lbeit slim, of carrying off a meaningful trophy for the first time since 1955, the vear before I was born. Yet omehow it is difficult to get

Rowing

## My new life as one man in a boat

Keith Wheatley on why Olympic gold medal winner Greg Searle now prefers going it alone

nificant and tough decision. "I owed so much of my gold medal to Johnny and it's a real challenge to be trying to do it on my own," admitted the younger arle. When they unexpectedly won the 1992 Olympic gold medal in the coxed pairs, Greg was undeniably the junior partner. Aged just 20 he was three years younger than Johnny, who at that time had just finished a law

the closest sporting partnership

imaginable - winning Olympic

medals with your brother - to

the loneliness of the sin-

ele-handed rower looks like a sig-

degree at Oxford. Greg had failed to get into what he calls "a proper university" and was beginning a some-what unsatisfactory career in quantity surveying. "Had Johnny not been around I wouldn't have been at Barcelona. He dragged me up to a level where we could race at the Olympics. It was the best thing in the world to win a gold medal with Johnny, in all ways. The day of winning it was ome," recalled Searle.

At the end of this month at the World Cup regatta in Munich, he begins a meticulously planned 24month campaign designed to

peak with a solo gold medal at the Olympics in Sydney. "My goal for this season is to be top five in all three world cup races then go on and win the world championships.

"I'm still on the steep bit of the learning curve, I think. Johnny and I were always really good at focusing for the big one and that ems to have carried on because I pulled out a really good result to come third at the World championship last year at my first serious sculling event."

For Searle, 1996 was a turning point. He and his brother rowed in the coxed four at Atlanta. Another gold medal looked on the cards. However, an Australian crew exploded from nowhere (rather as the Searle brothers had done at Barcelona) and left the Britons in third place. A disappointed Greg briefly contembefore discovering the joys of the

"It seemed like a natural thing Haining, the best-known British

to go off and do the single sculler prior to Searle's arrival. although I hadn't talked to any of the other guys about it, not even Johnny. The biggest revelation is how much I've enjoyed being in the boat on my own.

"When I go out to race it's just me, you're not going to let the side down. The pressure's off. It takes so much stress out of the situation to be in total control and do what you need to when it suits vou. "I thought that training would

be mega-dull out there on your

own but it's actually no more

boring that going up and down watching the back of someone

else's head. You don't have much of a laugh sitting in a line going up and down the river."

On the tideway, sculling has always possessed a certain tech-nical mystique, possibly culti-vated by those athletes devoted to the twin-oar discipline. The sport has certainly had its share of eccentrics, not least in Peter

"I'm not very comfortable with that kind of image, although Peter is great sportsman," said Searle, who blitzed his older rival in early May competing in the

The biggest revelation is how much I've enjoyed being in the boat . on my own

Winfield Cup, a single sculls race held since the last century over the University Boat Race course

Hairing had won the event in 1994/5/6. "The top scullers in the

crewed boats. In the past in this country it was guys who didn't make the rowing team who went towards sculling," said Searle. "We haven't won a Olympic

medal in it since 1976." What gave sculling a new lease of life after Atlanta was a radical revision of the Olympic rowing schedule that dropped coxed pairs and fours. With six seats gone from a previously 20-man squad, it was time for the ambitious to look around. While Johnny Searle directed his efforts towards a career as a City law-yer, Greg headed for the bluecollar end of the sport.

"In Britain sculling has been the poor relation to rowing. If you were an up and coming youngster you'd always be lirected towards a crewed boat. The authorities in rowing never pushed money towards sculling until the change in the Olympic programme.'

The technical changes to over-

world now have come out of come were considerable, even for how many people were going to a world-class oarsman with all day to train. Harry Mahon, a New Zealand born coach who also trains the Cambridge squad has been working with Searle since last year. "The main thing I've had to do is slow down my

> that doesn't work in a one-man shell," explained Searle. "Harry has turned me from John Daly into Tiger Woods. My left shoulder is over-developed from years of rowing with a single oar on my right side. I have to work at the gym on developing my weaker side. In the boat it's a technical thing rather than

movements in the boat, I used to

than timing and awareness and

purely strength." Off the water, Searle has left the building sites and begun working part-time as a trainee with former swimmer Adrian Moorehouse's Lane4 management consultancy. The group specialises in management coaching

and behavioural development. The relationship between the two gold medallists began when they shared a flat at the Barcalona Olympic village. Moorehouse had been the glory-boy four years earlier to Seoul and acted as mentor and guide to the

dszzled 20-year-old rower. "Adrian tried to fill me in on want a piece of me for different reasons. He was a fantastic help in how not to make a complete idiot of myself," said Searle, who has now been working as a motivational and training consultant with some of Lane4's clients for use aggression and strength more

"I know a lot of successful people in the sports arena and there's not many around who can do this kind of work successfully," said Moorehouse. "He's not just arriving somewhere like a star and showing off his gold medal to the clients. We're not in that type of business.

"You have to be more interested in people other than your-self and that doesn't always fit with a top sportsman's psyche. Greg has it and it's very rare." Searle's employer has another advantage to offer him: "We know what it's like to be going for a medal and we're determine to support him all the way to Sydney." added Moorehouse.

# Weekend Investor

Wall Street

# still rolls in

But John Authers believes that fund managers should be treading carefully

und managers are caught in a time warp. This time last year, the mutual fund industry met for its annual conference in Washington, and the predominant mood was almost fearful. The industry had fared so ing from small savers into the equity market at such a rate, that many feared it could not last.

All the talk was of investors' unrealistic expectations, and the danger that the money could leave as quickly as it entered. Inflows to equity funds alone in 1996 ad reached the unsustainably high level of \$221.6bn, leaving households worryingly exposed to a market which many people thought must have peaked.

Fund managers were also plagued by doubts over whether they were doing a good job. That passive index tracker funds were beating actively managed funds on performance seemed to call into question the whole basis of the industry.

Arthur Levitt, chahman of the Securities and Exchange Commission and the industry's chief regulator, had made a speech in which he attacked the fund industry for the prose it used to explain risks to investors which, he said, "trips off the tongue like peanut butter". He also voiced the fears of many, last year, when he said: "I fear that, in a downturn, those who don't understand risk may react precipitously and carelessly."

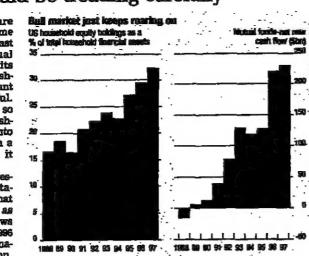

A year on, and nothing has changed. The S&P 500 index is up about 50 per cent since that last conference. The industry managed to suck even more money into equity funds last year (\$231.06bn) than it had the year before. The percentage of households' assets held in equitles rose from 29.54 per meaning that Americans

which they had at the peak of the late 1980s bull market. Index funds whipped active managers even more comprehensively in 1997 than they did in 1996. Vanguard, which spends its energies warning investors about a bull market, specialises in index funds, and

refuses to advertise its per-

have almost double the expo-

sure to the stock market

formance is now, despite itself, entrenched as the industry's most powerful company, out-selling even Fidelity Investments.
So this year's conference

was devoted, yet again, to the question of keeping investors' expectations within reason. There was a pervading sense that things could get no better.

Mutual funds are beginning to discover that their new-found power and influence within the land could bring extra responsibilities. Now that the funds hold more money than banks, some in Congress believe that funds should be forced to invest in their local communities, as banks are.

The privatisation of the rickety US social security system could also lead to tighter regulation as fund managers find themselves effectively working under contract to the government.

Levitt, again, acted as the chief messenger. Like others, he seemed struck by an air of unreality, citing a survey of small investors which found 95 per cent of ket now firmly into a period

any kind. Over breakfast yesterday, he inveighed against fund managers, asking them to question whether they were doing enough to explain risks to their investors.

He said: "I worry that the fund industry is building unrealistic expectations through performance hype. I read the ads. I see nothing but performance, perfor-

mance, performance. Why not outline clearly the impact of expenses or the nature of risks?

This was a little unfair. Vanguard provides an exam ple of a fund company which refuses to excite its investors but keeps shifting product, while many companies focus on general image advertising rather than their old aggressive ads proclaiming their performance. Levitt might also have

mplimented the industry for its starring role last October. Strategists across the world believed that mutual fund shareholders would sell out after the New York Stock Exchange was forced to close early in the wake of the Asian crisis.

If ever there was a time for small savers to react "precipitously and carelessly", to use Levitt's own words, this was it.

Instead, they held firm, and provided the cash needed for Wall Street, and the world's other large stock markets to stage a rally. But with the equity mar-

Americans are satisfied with of trading in a range, after the returns on their funds - its growth spurt earlier this the highest score ever year, the fund industry carefully. As Levitt rightly says, mutual funds could be setting themselves up for "millions of disappointed

Pace Micro

The question of whether should be fairly constant equities are overvalued after the bull market of recent years obviously is the issue of the moment. So, this colunn has examined another approach to valuing equities

The yield ratio compares the income return from bonds and equities. When the ratio is high, investors are giving up a lot of income when they buy equities; in theory, that makes it more likely that shares are overvalued. When the ratio is

Another way of looking at the same subject is that investors are willing to accept a lower dividend yield because they expect dividends to grow. Given an assumed level of dividend

outstrip the initially higher return from bonds.

In theory, this figure yield ratio is high, the maring on a higher-than average rate of dividend growth; at times when it is low, they should be expecting dividend growth to be singgish.

That gives us a rough and years it takes for dividenda to eatch up with bonds, the better. After all, if you are newly retired and faced with ties, you do not want to wait until you are, way, 80, to get vour desired income

Using Barclays Capital's equity-gilt study, you can go back over time to see how long it actually took dividends to catch up with bond yields. The graph shows the numbers dating back to 1959.

below the return on bonds. As you can see, until 1983, t normally took fewer than 10 years for the crossover point to be reached. The double-digit years (1968, 1972 and 1978) generally occurred when the yield ratio was high, and preceded either ear markets or recessions.

Ever since 1988, however, aken longer. Indeed, investors who bought shares to or later still have not seen their dividend income catch up with the bond yield on offer originally.

The graph uses the dend growth will be in line with nominal gross domestic product growth of 5 per cent a year (broken down, say, between 2.5 per cent inflation and 25 per cent real output growth). One could argue with this assumption on several grounds. First, nominal GDP growth could be higher, either because inflation or output growth could grow faster than GDP, either because the profit share of the economy ses or because dividends improve as a share of grow faster than GDP for- the credit, and they receive ever, and the UE probably is their dividends net. For much nearer the top of the them, the real yield ratio is profits cycle than the bot-more like 2.6, and it will take

assumption for the moment. How does the present market look? On a 5 per cent dividend growth rate and a yield ratio of 2.1, it will take 16 years for dividend income to overtake that from bonds.

dend yield actually was That is a longer period than at any time apart from 1989 (which was followed by the 1990 bear market). : Does that make the market overvalued? To be fair.

the present figure is not prevailing at the end of 1994, 1995 and 1996 - and the UK stock market has done pretty well since then. One could make the case

that, throughout the 1960s and 1970s, gilt yields were too low as investors failed to anticipate those decades' high inflation rates. Rather than equities being cheap, gilts were too dear.

however, bond investors have learned their lesson: Real bond yields have been higher, and it has taken lunger for dividend growth to catch up; arguably, recent levels represent the norm, whereas the 1960s and 1970s were the aberration. But one should not forget the abolition of the dividend

tax credit. The figures quoted above use the gross dividend yield, but that is something of a fictional concept these days; no lunger more like 21 years for the reached - way longer than anything seen before.

Hardly surprising, then, that institutions have been switching increasingly from equities into gilts. philip.coggan@FT.com

is.

of a crisis often erupts in the stock exchange and the foreign currency market. When the second, political, stage breaks

out in the streets, things are starting to get really serious. Smoke and gunfire were missing from the Bank Credit Analyst conference in London this week, but the mood of growing alarm about Asian trends was unmistakable.

Last year's stage one of the Asian meltdown inflicted nothing worse than a hesitation upon western markets: the negative impact on demand proved to be much less important for US and European financial markets than the favourable implications for

inflation and liquidity flows. Now, though, the alarming depth - and likely extended duration – of the Asian crisis is becoming clearer. All this and Indian nuclear bomb tests, too. Followers of BCA, the

monthly, are watching for signs that the moment is close for a gut-wrenching strategic switch. Will upheaval lead to opportunity? Looting and arson are contrarian signals, of a kind, just like the outbreak of the Guif war in January 1991; buy on the

sound of gunfire. At some stage, a shift from the booming western equity markets to the desperate Asian stock exchanges will be signalled: mber that the Indone index has collapsed by 90 per cent relative to Wall Strest in

Barry Riley

## Smoke signals hot up

Alarm over the trends in Asia is growing apace

but stay close to the telephone. One day soon, history will come back from the dead and overwhelm the "new paradigm". On the 100-year charts, US equities appear as expensive as in 1929 and more so than in 1968, the century's other outstanding selling opportunity. Overall, BCA thinks Wall Street is

overpriced by a third.

three times domestic demand. Now US business, encouraged by the decline in the cost of capital, has embarked upon its own fixed-capital boom. It is not so dramatic, but has been enhanced by a technology-linked jump in the productivity of that investment, so that industry can churn out more product for less capital. This is adding up to a profoundly deflationary picture,

Perhaps that is not really so

at any rate for traded goods. At some stage, a shift from booming western markets to the desperate Asian stock exchanges will be signalled

bad: a "normal" 25 per cent correction would unwind the distortion. But US investors are still in no mood to respond to the bears. Profits may be decelerating fast - the latest earnings per share shocker came from Hewlett-Packard this week – but ordinary Americans do not believe profits can be under serious pressure when such a corker of an economic boom is

still proceeding merrily. The feared torrent of cheen goods from Asia has not really arrived yet. Some say this is because money is too scarce to finance production, others that containers have been hastily diverted to more creditworthy. destinations well away from Asia (no containers, no exports). Overcapacity, however, financed investment, remains the key nental theme of the Asian crisis. Korea's car production

capacity in 2000 is likely to be

Producer price inflation has just about disappeared in most western economies.

In services, it is a different matter. In the UK, for instance, prices for services are rising at nearly 5 per cent. Both the US and UK are troubled by lopsided economies and may yet be forced to raise short-term interest rates in spite of the risk of collateral damage - to UK manufacturing industry, for instance, which was this week revealed to be in successive quarters of declining

The consequences of a US rate rise - which could just happen next week - are potentially much more serious: a dollar rate increase could be the straw that breaks the backs of the Asian

The Japanese authorities are already struggling to support the yen amid fears of a capital flight: Japanese investors bought \$21bn

worth of foreign securities in April .

if the yen collapses, China. which is suffering a sharp economic deceleration, wouldthen come under enormous pressure to respond. If devaluation further enhances China's awesome . competitive power, the second

stage of Asia's meltdown will be truly under way. Healthy balance could be getting farther away. The near-panic in several parts of Asia is, if anything, generating an increase in savings, leading to still greater capital outflows, especially to the aafe haven of

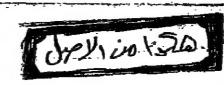

the US dollar (and, recently, to the D-Mark, the euro-in-waiting). All this should be very good for bonds. And if bond yields are falling, it will be hard for equity prices to go down, even if the

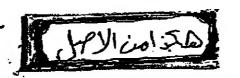

earnings news is poor. If low inflation in western economies turns into outright deflation, however, stock markets will crash. With the final collapse of pricing power. US companies will be unable to sustain the very high returns on equity which have underpinned the great buil market.

But will it really come to that? So far, Asia's crisis has simply had the benign effect of pouring cheap capital and cut-price raw materials into America's hot and bubbling economy.

Perhaps we will be surprised at how long this global air-conditioning mechanism will continue to work. But, at some stage, even the Americans will

## Bids and deals

BMW, the German motor manufacturer, stitacked the £430m bid by rival Volkswagen for Rolls-Royce Motors but said it would neither withdraw nor increase its own 2340m bid for the UK luxury car-maker. Vickers, the UK engineering group that is selling R-R, has recommended that shareholders vote for the VW offer when the two are put forward at an extraordinary meeting on June 4.

□ PPG Industries, the world's largest maker of industrial and automotive paints, confirmed it was considering a joint bld for Courtaulds with Donaldson, Lufkin & Jenretie, the US investment bank.

Shares in Courtaulds rose 9p to 473p - above the 450p level of Akzo Nobel's £1.83bn agreed bid for the UK coatings,

fibres and chemicals group.

□ Pearson, the media company that owns the Financial Times, has linked with Hicks Muse Tate & Furst, one of the largest leveraged buy-out funds in the US, to bid for Simon & Schuster, the US publisher being sold by its parent group

It is thought the two have submitted a bid of about \$4.5bn and that, if successful, Pearson would keep only the US group's educational publishing operations.

## Spy cameras, mad cows and expensive rules

Governments have two sets of values when it comes to spending money on safeguards, argues Brian Reading

and spy cameras differ? Beef ribs kill, claims the eras save lives, say the police. It is interesting to compare the economics of

Spy cameras, installed on roads, cost £30,000 each, which seems a bit steep. They also cost £8,000 a year each to maintain. At present, there are 2,000 of them on Britain's roads, only a quarter of which are work-

ng. The Chief Police Officers' Association has been studying experience in the Australian state of Victoria. Roads there have been saturated with spy cameras. This has halved the number of people killed and injured in crashes. Put spy cameras at all the UK's 16,000 accident black spots, say the police, and road deaths and injuries might similarly be halved. (Or perhaps not, public outery and extensive vandalism.)

Let us assume they are right. It would cost £430m to install the cameras and £128m a year to operate them. Road deaths total 3,500 a year, so up to 1,750 lives might be saved. The capital cost per life saved over a decade would be £24,000, and the annual running cost £73,000 a life. This ignores the savings to the health service and economy of the 75,000 people who otherwise would have been

that there was a one in 20 chance of one case of CJD in 1998 caused by eating beef on the bone.

Thus, while 70,000 people might die on Britain's roads in the next 20 years in the absence of more spy cameras, only one person might die through the sale of beef

on the bone. There is no way of knowing exactly how much the ban costs UK farmers. It has been put as high as £1bn. But if it is only half this

It should be mandatory that any act of parliament or official regulation be accompanied by an estimate, however uncertain, of the likely costs to consumers and producers

one life comes to £500m. any act of parliament or How can a government jib at spending £420m to save 17,500 lives over the next decade, yet ban the sale of it was likely to impose on beef on the bone at a cost of consumers and producers. 2500m to save only one?

The answer seems obvions. It has one set of values when spending taxpayers' money and a different set when the cost falls on oth-

It plays a similar game with existing spy cameras. The police have to pay the £8,000 a year it costs to maintain them. The government gets, and keeps, the proceeds from speeding fines. That is why threequarters of existing cameras

Most governments are the

calculated that they cost business more than it would cost to provide 24-hour help. one on one, for every handi-

capped person. It is possible the handicapped would not want such constant attention. But the point remains. Government regulations cost money.

While policies which require public spending are costed scrupulously, no effort is made to cost new

amount, the cost of saving should be mandatory that official regulation be accompanied by an estimate, however uncertain, of the costs This might help to prevent the mad politician disease which was to blame for the beef ban,

The next step would be to try to change laws in a way that cost nothing but, similarly, showed big returns. In Britain, cyclists are banned from riding on the pavement. In Tokyo, they are not, and mostly do.

The relative speed of mally, but not always, is less than the relative speed of cyclists and cars. If UK cyclists behaved in the con-

Brian Reading is a director Spongiform Encephalopathy same. The US applies strin-siderate way that Japanes of Lombard Street Research Advisory Committee gent building regulations to do, the result of lifting our warned the government ensure access for handiban would save accidents. It capped people. It has been is a big if, but I will return to this later.

Another costless measure would be to allow passing on the inside on motorways It is less dangerous than changing lanes and it is also

The classic example of a policy change which would save, and even make the state monopolising their sale. Forget the false moral ity of those opposed to legalthat drugs do. The issue is whether they would do less or more harm if available

legally. bition in the US, does more harm than good. It creates profits from pushing drugs that criminals are only too willing to seize. The more the government spends try ing to reduce drug traffick ing, the greater the profit and the more criminals are attracted to the trade. This is why smoking marijuana is on the increase while cig arette smoking is declining

But back to evelists. A minority would be a menace on the pavements, but most of them are already. Equally, there would be an outery against saturation by spy cameras. But behaviour can and does change.

Society sets its own codes the latest of which is called being "politically correct" Most political correctness is nauseating conformity to a neurotic idea of much safer roads saving thousands of lives could be sold to the public After all, drink-driving laws have been.

## Capture world stock market potential ... without risk to your capital

## The power of transatlantic alliance

ANGLO-AMERICAN SecurityPlus The first option from Midiand Offshore Guaranteed Capital Investment Bonds Limited links your returns to the UK and US stock markets. Available over 3 or 5 years, it is designed to benefit from further market gains. It returns your capital in full, with the potential to earn up to a flat minimum flat rate return of up to 3.6% p.a.

## The strength of a united Europe

EUROPEAN Growth Progress towards European Union and recovery from recession has brought renewed optimism for European stock markets. The European Growth option allows you to share in this opportunity through linking returns to the French, German and Swiss stock markets over three and a half years. Your return rate of 12% p.a. You have the added comfort of a could be up to an equivalent of 17% p.a. At a minimum your investment will be returned in full.

● Invest from £5,000 or US\$5,000 in either option ● Bonus paid for early investment on both For full information, please return the coupon or contact us on the numbers shown. But hurry, this offer must close on 24 July 1998.
